## **The Maritime History Of The World:**

**The Maritime History of the World** Duncan Haws, Alexander Anthony Hurst, 1985      **The Sea and Civilization** Lincoln Paine, 2015-10-27 A monumental retelling of world history through the lens of the sea revealing in breathtaking depth how people first came into contact with one another by ocean and river lake and stream and how goods languages religions and entire cultures spread across and along the world's waterways bringing together civilizations and defining what makes us most human The Sea and Civilization is a mesmerizing rhapsodic narrative of maritime enterprise from the origins of long distance migration to the great seafaring cultures of antiquity from Song Dynasty human powered paddle boats to aircraft carriers and container ships Lincoln Paine takes the reader on an intellectual adventure casting the world in a new light in which the sea reigns supreme Above all Paine makes clear how the rise and fall of civilizations can be linked to the sea An accomplishment of both great sweep and illuminating detail The Sea and Civilization is a stunning work of history      **The Maritime History of the World** Duncan Haws, Alex A. Hurst, 1985      **Maritime History and Identity** Duncan Redford, 2013 The sea and its relation to human life has always been a subject of fascination for historians For the first time this book looks at the field of Maritime History through the prism of identity looking at how the sea has influenced the formation of identity at a national local and individual level from the early modern age to the present It looks at a variety of people who interacted with the sea in different ways from merchant sailors to naval officers and on land from dockworkers to the civilians who participated in the sea based festivals in the Mediterranean port city of Messina A cultural strand runs through the volume with chapters focussing on the cultural construction of the naval hero in literature poetry music and art and an appraisal of the Japanese author and journalist It Masanori whose works had such a profound influence on Japan's post World War II national identity A key focus is the ways in which the Royal Navy influenced British identity at a national and regional level but other countries with a strong naval tradition such as Japan Italy and Germany are also analysed By bringing together a variety of themes related to identity this book provides the first attempt to thoroughly analyse the ways in which maritime historians have engaged with the question of identity in recent years In doing so it provides an important and unique addition to the historiography which will be essential reading for all scholars of maritime and naval history and those concerned with the question of identity Bloomsbury Publishing      **A World at Sea** Lauren Benton, Nathan Perl-Rosenthal, 2020-10-09 The past twenty five years have brought a dramatic expansion of scholarship in maritime history including new research on piracy long distance trade and seafaring cultures Yet maritime history still inhabits an isolated corner of world history according to editors Lauren Benton and Nathan Perl Rosenthal Benton and Perl Rosenthal urge historians to place the relationship between maritime and terrestrial processes at the center of the field and to analyze the links between global maritime practices and major transformations in world history A World at Sea consists of nine original essays that sharpen and expand our understanding of practices and processes across the land sea divide and the way they

influenced global change The first section highlights the regulatory order of the seas as shaped by strategies of land based polities and their agents and by conflicts at sea The second section studies documentary practices that aggregated and conveyed information about sea voyages and encounters and it traces the wide ranging impact of the explosion of new information about the maritime world Probing the political symbolism of the land sea divide as a threshold of power the last section features essays that examine the relationship between littoral geographies and sociolegal practices spanning land and sea Maritime history the contributors show matters because the oceans were key sites of experimentation innovation and disruption that reflected and sparked wide ranging global change Contributors Lauren Benton Adam Clulow Xing Hang David Igler Jeppe Mulich Lisa Norling Nathan Perl Rosenthal Carla Rahn Phillips Catherine Phipps Matthew Raffety Margaret Schotte

Hurst,1985      **The History of the World** Hans Ferdinand Helmolt (1865- ed),1902      **Maritime History as Global History** Maria Fusaro,Amélia Polónia,2017-10-18

This study aims to provide new insights into the connections between maritime history and global history It demonstrates the significance of maritime activity as a conduit of global exchange by examining local national and international interdependencies and trade networks and a broad range of time periods geographical areas and various sub divisions of maritime historical research It is composed of ten essays with an introductory chapter and concluding chapter The first five essays discuss the effects globalisation on shipping in the early modern period the following three discuss maritime transportation and the economics of industrialisation from the nineteenth century to the present day the next discusses the impact of global entrepreneurialism on maritime history the penultimate discusses the connections and variables between maritime and global history and the concluding chapter examines the theoretical assumptions surrounding the two disciplines using the globalisation of Early Modern Spain as a case study to do so The study demonstrates that the core strength of maritime history is its essential place in global history and that the process of globalisation began at sea      Maritime History as World History Daniel Finamore,2004

From the foreword In the 21st century the division between the maritime and terrestrial worlds has virtually disappeared Events and issues that previously involved only maritime subjects need to be reexamined today from the perspective of those events and developments occurring simultaneously ashore It is through this approach as demonstrated by this fine collection of essays that maritime history truly becomes a vehicle for understanding global history Maritime events today appear to be tied more closely to events ashore than ever before and seafaring has been the primary catalyst of much of world history These essays by many of the world s leading scholars present an up to date assessment of the field of maritime history in the early 21st century They offer fresh insights into the impact of seaborne exploration warfare and commerce on the course of history from the independent traditions of ancient Japanese Arab and Mediterranean seafarers to the rapid European expansion around the

globe from the 16th century onward The book is organized around the themes of the sea as a theater of exploration a highway of commerce an arena for conflict and a muse for artistic inspiration The authors utilize information from the earliest recorded voyages to the present to illuminate an era s interesting and universal attributes and the successful explorers motivations usually a combination of scientific political economic and religious reasons They also show that the competing principles of freedom of the seas versus exclusive governance by political entities are central to all discussions of the sea in history The book underscores how the myriad events that entwine humankind with the sea both those of written record as well as those of oral tradition form the substance of a history of worldwide significance Its wide ranging perspective will appeal to all readers who seek an engaging evaluation of the significance of the sea in human history Published jointly with the Peabody Essex Museum *New Perspectives on Maritime History and Nautical Archaeology*
