Super Rich Texts And Contexts:

Text and Context Susan Jones, 2012-12-06 *Text and Context* Document Storage and Processing describes information processing techniques including those which do not appear in conventional textbooks on database systems. It focuses on the input storage retrieval and presentation of primarily textual information together with auxiliary material about graphic and video data. There are chapters on text analysis as a basis for lexicography, full text databases and information retrieval, the use of optical storage for both ASCII text and scanned document images, hypertext and multi media systems, abstract document definition and document formatting and imaging. The material is treated in an informal way with an emphasis on real applications and software. There are among others case studies from Reuters, British Airways, St Bartholomew's Hospital, Sony and HMSO. Relevant industry standards are discussed including ISO 9660 for CD ROM file storage, CCITT Group 4 data compression, the Standard Generalised Markup Language and Office Document Architecture and the Postscript language. Readers will benefit from the way Susan Jones has brought together this information in a logical sequence to highlight the connections between related topics. This book will be of interest to second and third year undergraduates and MSc students in computer science, to BTEC HTD final year computing and information science students either specialising in IT or taking an IT option and to students taking courses in IT and in business computing systems.

Context and Text Kevin W. Irwin, 2018-07-12 One of the most influential works in the debate over the concept and definitions of liturgical theology. *Context and Text* by Monsignor Kevin W. Irwin is now available in a completely rewritten new edition. In light of the historical theological and pastoral mandates of the Constitution on the Sacred Liturgy, *Context and Text* is both a proposal for and an example of an investigation of the Church's liturgical praxis from a liturgical theological perspective. This second edition which includes an expanded introduction covers new liturgical and ecclesial contexts resulting from newly promulgated liturgies, further research in methodology for liturgical studies, consideration for changes in the cultural contexts in which people celebrate the liturgy. Besides brand new chapters on time and sacramentality and additions to the chapter on the arts, this edition also considers the ongoing texts and contexts of the liturgy as always a new event in the life and ongoing discussion of liturgical theology within Christianity.
