**Marines on the Beach** Christopher Paul, 2008-09-30 Paul explores both how and why U S military intervention decisions are made Pursuit of that inquiry requires the identification of decision participants thorough examination of the decision making processes they employ and recognition of several factors that influence intervention decisions the national interest legitimacy and the legacies of previous policies This book provides chapter length treatment of each of these issues The research is based on detailed historical case studies for the four U S Marines on the beach military interventions in Latin America since World War II The Dominican Republic 1965 Grenada 1983 Panama 1989 and Haiti 1994 Additional cases notably Afghanistan and Iraq enter the discussion when considering findings with broader implications Of the existing theories of governance that compete to explain government policy making Paul finds that elite theory provides the best general model for intervention decision making but that the notions of both pluralist and class theorists contribute to a complete explanation and sometimes in an

unexpected way Findings also indicate considerable contribution from and constraint by institutional sources However far from finding that institutional factors are wholly deterministic this research offers support for a choice within constraints model Conclusions suggest that top decision makers especially the president enjoy wide latitude in framing the national interest and in choosing where to and where not to intervene The Magic Power of Mental Images Dean Amory,2013-05-15 Jos Ortegay Gasset was so impressed by the power of metaphors that he compared them to a tool for creation which God forgot inside of us when he created man When I asked myself where metaphors get this tremendous power from I realized that mankind has an even much more powerful tool at its disposition Mental Imagery Mental Imagery is the key to achieving our goals and the internal screen on which we project our dreams It allows us to simulate procedures familiarize with environments and situations before we get to know them in real life It helps us to relax but just as well will arouse us or prepare us for future actions With the help of Mental Imagery we can build confidence and readiness stimulate healing and recovery change our behaviour or literally borrow the mind of a genius How to learn and implement this power and benefit from its many advantages is what this book is all about Confidence-building Measures Jonathan Alford,1979
