Aux frontières de la médecine

Thomas Bujon, Christine Dourlens, Gwenola Le Naour, 2014-11-26 La colonisation par la médecine de nouveaux domaines d'intervention et l'élargissement de l'activité médicale au-delà du thérapeutique est identifiée par les sciences sociales sous le terme de médicalisation. Ce processus est souvent assimilé à un accroissement continu du pouvoir médical et une extension significative du contrôle social sur les malades et la société. Cet ouvrage propose de faire un pas de côté par rapport à cette approche. Il place l'échelle d'analyse en portant le regard sur le travail des médecins eux-mêmes quand ils interviennent aux frontières de la médecine. Comment font-ils pour exercer leur profession quand ils sont propulsés dans des lieux où ils ne disposent ni des appuis scientifiques ni des fondements moraux auxquels ils s'adossent habituellement ? Comment et quelles conditions inventent-ils de nouvelles possibilités d'agir dans des contextes où leur légitimité n'est pas assurée voire contestée ? Comment la médicalisation met-elle à l'épreuve les médecins qu'ils en soient les principaux instigateurs ou qu'ils doivent en gérer au quotidien les conséquences ? Chacune des contributions qui composent cet ouvrage tente de répondre à ces questions et ce faisant s'attache à faire ainsi découvrir des facettes encore peu explorées de la médicalisation.

Radical Healing Rudolph Ballentine, 1999 This extraordinary book offers nothing less than a new vision of medical care. Rudolph Ballentine M.D. has created a unique integrative blending of the primary holistic schools of healing that is far more potent than any one of these alone. Like Deepak Chopra and Andrew Weil, Rudolph Ballentine is a medical doctor who became intrigued by the workings of mind-body medicine and looked beyond the West in his search for understanding. Drawing on thirty years of medical study and practice, Dr. Ballentine has accomplished a singular feat: integrating the wisdom of the great traditional healing systems—especially Ayurveda, homeopathy, Traditional Chinese Medicine, European and Native American herbology, nutrition, psychotherapy, and bodywork. Melded together, the profound principles buried in these systems become clearer and stronger, and a new level of effectiveness becomes possible. Healing and reorganization are accelerated and deepened physically, emotionally, and spiritually. The result is transformation. The result is radical healing. *Radical Healing* harnesses nature's medicinal plants and other natural substances with commonsense essentials such as diet, exercise, and cleansing, as well as the most profound principles of spiritual and psychological transformation. In Dr. Ballentine's synthesis, illness is an opportunity for growth that can go far beyond recovery. Through radical healing, old habits and attitudes that supported the development of disease fall away to be replaced by the clarity that comes with a whole new way of being in the world.
