It tackles the subject via an analysis of maps dating from circa 1434 to 1865 with an emphasis on the period before 1600. The book begins with an appraisal of the peculiar circumstances which led late medieval Europe to pursue long distance travel both overland and by sea, introduces cosmographic traditions inherited from classical times and investigates pre-Columbian excursions into the western ocean. Finally, the great voyages and mappamundi of the early sixteenth century are described in depth. After 1600, the focus begins to narrow to North America and particularly to the colonization of the American Northeast. All maps discussed in detail are illustrated. 40 full page b/w plates, 25 full page color plates.     **The Bookseller and the Stationery Trades' Journal** ,1898 Official organ of the book trade of the United Kingdom     *Indiana School Journal and Teacher* ,1870     **School** ,1914     The Educational Times, and Journal of the College of Preceptors ,1899     **The Geographical Magazine** ,1874     **The Geographical Magazine** Sir Clements Robert Markham, 1875     *The Illinois Schoolmaster* Albert Stetson, Ira S. Maps shape and communicate information for the sake of improved orientation. But maps exist for states as well as individuals, and they need to be interpreted as expressions of power and knowledge, as Steven Seegel makes clear in his impressive and important new book. *Mapping Europe's Borderlands* takes the familiar problems of state and nation building in eastern Europe and presents them through an entirely new prism: that of cartography and cartographers. Drawing from sources in eleven languages, including military, historical, pedagogical, and ethnographic maps, as well as geographic texts and related cartographic literature, Seegel explores the role of maps and mapmakers in the East-Central European borderlands from the Enlightenment to the Treaty of Versailles. For example, Seegel explains how Russia used cartography in the aftermath of the Napoleonic Wars and later formed its geography society as a cover for gathering intelligence. He also explains the importance of maps to the formation

of identities and institutions in Poland Ukraine and Lithuania as well as in Russia Seegel concludes with a consideration of the impact of cartographers regional and socioeconomic backgrounds educations families career options and available language choices     Educational Times ,1880     *Catalogue of Title Entries of Books and Other Articles Entered in the Office of the Register of Copyrights, Library of Congress, at Washington, D.C.* Library of Congress.
