Supernatural The Unseen Powers Of Animals:

Supernatural, 2006 *Supernatural* John Downer, 1999 On Earth we are bombarded with information in the form of light sound and electro magnetic waves The human senses filter most of this information out and we experience life through five narrow windows on the world with the curtains barely open Animals also use their senses to perceive their surroundings but are receptive to a selection of information different from that of humans dogs for instance have a sense of smell many times greater than our own and goldfish can see the beam of light from a TV remote control **Supernature** John Downer, 1999 Do animals have powers beyond the known forces of nature From bats ability to fly in darkness to elephants communicating with sounds too low pitched for us to hear scientists have long known that animals possess senses and abilities that have no human counterpart Step into a time warp where high speed events like a brisk rainfall are perceived almost in slow motion with indescribable detail and see how modern day lights sonic signals and electricity confuse and sometimes kill animals *The Hidden Powers of Animals* Karl Shuker, 2001 Reveals the amazing truths about animals and their sensitivities skills and strengths from the bat s ability to catch insect prey in complete darkness to animals that cure their own ailments by using herbs in their habitats **The Sixth Sense Reader** David Howes, 2024-11-01 What is the sixth sense Is it physical mental or spiritual Do we all possess it or is it unique to exceptional individuals Might there be a seventh sense and an eighth sense as well What role does culture play in determining the range of our perceptual abilities The search for a supplementary sense has taken many directions and yielded numerous possibilities for an additional faculty of perception from magnetism and movement to dreaming and clairvoyance Stimulating reflection and debate The Sixth Sense Reader explores the cultural contexts which give rise to such reports of psychic and other powers that exceed the ordinary bounds of sense In this groundbreaking volume leading scholars in history anthropology and biology take the reader on a tour of the far borderlands of consciousness From the world beneath to the world beyond the five senses every potential avenue of sensation is opened up for investigation **The Ancient Language of Sacred Sound** David Elkington, 2021-04-06 Details how sacred sites resonate at the same frequencies as both the Earth and the alpha waves of the human brain Shows how human writing in its original hieroglyphic form was a direct response to the divine sound patterns of sacred sites Explains how ancient hero myths from around the world relate to divine acoustic science and formed the source of religion The Earth resonates at an extremely low frequency Known as the Schumann Resonance this natural rhythm of the Earth precisely corresponds with the human brain s alpha wave frequencies the frequency at which we enter into and come out of sleep as well as the frequency of deep meditation inspiration and problem solving Sound experiments reveal that sacred sites and structures like stupas pyramids and cathedrals also resonate at these special frequencies when activated by chanting and singing Did our ancestors build their sacred sites according to the rhythms of the Earth Exploring the acoustic connections between the Earth the human brain and sacred spaces David Elkington shows how humanity maintained a direct

line of communication with Mother Earth and the Divine through the construction of sacred sites such as Stonehenge Newgrange Machu Picchu Chartres Cathedral and the pyramids of both Egypt and Mexico He reveals how human writing in its original hieroglyphic form was a direct response to the divine sound patterns of sacred sites showing how for example recognizable hieroglyphs appear in sand patterns when the sacred frequencies of the Great Pyramid are activated Looking at ancient hero legends those about the bringers of important knowledge or language Elkington explains how these myths form the source of ancient religion and have a unique mythological resonance as do the sites associated with them The author then reveals how religion including Christianity is an ancient language of acoustic science given expression by the world s sacred sites and shows that power places played a profound role in the development of human civilization **The Sense of Being**
