Superpowers And Arms Control:

The Superpowers and Nuclear Arms Control Dennis Menos, 1990-04-23 The nuclear arsenals of the United States and the Soviet Union are larger better equipped and deadlier than at any other time in history This incisive book contends that the superpowers while exhibiting enormous ingenuity in the area of arms development have shown only a minimal interest toward the containment of arms This is a carefully documented evaluation of the mismanagement of nuclear arms control by the superpowers and of their failure to contain the nuclear arms race despite their involvement in the process for over a quarter of a century Only the superpowers can reduce the proliferation of nuclear arms and in the process lessen the likelihood of nuclear war through accident miscalculation or crisis escalation Yet forty four years after Hiroshima not a single wanted nuclear weapon has been eliminated by them The Superpowers and Nuclear Arms Control addresses a broad spectrum of nuclear arms control issues beginning with the history of the nuclear arms race the lukewarm attempts by the superpowers at nuclear arms control and the role of the nuclear havenots The book then considers current threats to arms control evidenced by the termination of the SALT regime and plans to discard the ABM Treaty A discussion of the congressional executive split on numerous key arms control issues is followed by conclusions drawn from observing decades of negotiation Comprehensive appendices contain valuable charts and other documents that reinforce the content of the text This resource is a useful tool for arms control and disarmament activists students and researchers and for the many men and women everywhere who are at a loss to understand why so little is being accomplished in this critical area

Analyzing Strategic Nuclear Policy Charles L. Glaser, 2014-07-14 With sweeping changes in the Soviet Union and East Europe having shaken core assumptions of U S defense policy it is time to reassess basic questions of American nuclear strategy and force requirements In a comprehensive analysis of these issues Charles Glaser argues that even before the recent easing of tension with the Soviet Union the United States should have revised its nuclear strategy rejecting deterrent threats that require the ability to destroy Soviet nuclear forces and forgoing entirely efforts to limit damage if all out nuclear war occurs Changes in the Soviet Union suggests Glaser may be best viewed as creating an opportunity to make revisions that are more than twenty years overdue Glaser s provocative work is organized in three parts The Questions behind the Questions evaluates the basic factual and theoretical disputes that underlie disagreements about U S nuclear weapons policy Alternative Nuclear Worlds compares mutual assured destruction capabilities MAD a world in which both superpowers societies are highly vulnerable to nuclear
