Peters,2001 Visit our website for sample chapters      **Poststructuralism and Educational Research** Michael A. Peters,Nicholas C. Burbules,2004-10-26 Poststructuralism and its implications for something called postmodernism is a major topic of discussion in social theory and research generally including educational research The works of the major authors in this tradition Foucault Lyotard Cixous Derrida Haraway to name a few are challenging and difficult Yet more and more theorists and researchers in educational scholarship use this term to describe their work What does poststructuralism mean for these authors and what significance does it have for educational inquiry This book takes on these central questions and explores the impact of poststructuralism in language that makes the basic issues at stake accessible for a broad readership Michael Peters and Nicholas C Burbules highlight the implications of a poststructuralist stance for the conception of the research subject and examine its standards of validity and methods of investigation They also lay out the distinguishing characteristics of this approach to educational inquiry using as examples the particular ways in which writers including Giroux McLaren Lather and Ball have tried to incorporate the poststructuralist perspective into their investigations of educational issues The emphasis throughout this book will be on making these complex theoretical issues tangible and salient for the educational researcher      **Structuralism and Semiotics** Terence Hawkes,2003-07-17 Published in 1977 as the first volume in the New Accents series Structuralism and Semiotics made crucial debates in critical theory accessible to those with no prior knowledge of the field Since then a generation of readers has used the book as an entry not only into

structuralism and semiotics but into the wide range of cultural and critical theories underpinned by these approaches It remains the clearest introduction to some of the most important topics in modern critical theory A new afterword and fresh suggestions for further reading complete this new edition      *Consumption* Dr Robert Bocoock, Robert Bocoock, 2008-02-20 This book analyzes the main post war features of consumption It traces the historical development of consumption and discusses the major contributions made by sociologists in discussing the subject Robert Bocoock is Senior Lecturer in Sociology at the Open University      After Meaning d'Aspremont, Jean, 2021-12-09 Inspiring and distinctive After Meaning provides a radical challenge to the way in which international law is thought and practised Jean d'Aspremont asserts that the words and texts of international law as forms never carry or deliver meaning but instead perpetually defer meaning and ensure it is nowhere found within international legal discourse      **Archaeological Semiotics** Robert W. Preucel, 2010-04-26 This interdisciplinary book examines archaeology's engagement with semiotics from its early structuralist beginnings to its more recent Peircian encounters It represents the first sustained engagement with Peircian semiotics in archaeology as well as the first discussion of how pragmatic anthropology articulates with anthropological archaeology Its central thesis is that archaeology is a distinctive kind of semiotic enterprise one devoted to giving meaning to the past in the present through the study of materiality It compliments standard studies of linguistics and reformulates contemporary theories of material culture Providing an introduction to Saussure and a review of his legacy across structural symbolic and cognitive anthropology Preucel goes on to present the Peircian alternative and highlights its influence on pragmatic anthropology Of special interest are the discussions of the interrelations of structuralism and processual archaeology poststructuralism and postprocessual archaeologies and cognitive science and cognitive archaeology The author offers two original case studies demonstrating how material culture pragmatically mediates social relations one focusing on the aftermath of the Pueblo Revolt from 1680 1694 and the other on the New England utopian community of Brook Farm from 1842 1846 Throughout his analysis Preucel emphasizes the close links between archaeology and other social sciences But he also contends that archaeology by virtue of the powerful ideological character of the past can open up new spaces for discourse and dialogue about meaning and in the process make a valuable contribution to contemporary semiotics      *Deconstruction and the Reminders of Phenomenology* Tilottama Rajan, 2002 This book disentangles two terms that were conflated in the initial Anglo American appropriation of French theory deconstruction and poststructuralism Focusing on Sartre Derrida Foucault and Baudrillard but also considering Levinas Blanchot de Man and others it traces the turn from a deconstruction inflected by phenomenology to a poststructuralism formed by the rejection of models based on consciousness in favor of ones based on language and structure The book provides a wide ranging and complex genealogy of French theory from the 1940s onward placing particular emphasis on the largely neglected early work of the theorists involved and on deconstruction's continuing relevance The author argues that deconstruction is a form of radical antiscientific modernity an interdisciplinary reconfiguration of

philosophy as it confronted the positivism of the human sciences in the 1960s By contrast poststructuralism is a type of postmodern theory inflected by changes in technology and the mode of information Inasmuch as poststructuralism is founded upon its constitutive loss of phenomenology in Judith Butler s phrase the author is also concerned with the ways phenomenology particularly Sartre s forgotten but seminal Being and Nothingness is remembered repeated in different ways and never quite worked through in its theoretical successors Thus the book also exemplifies a way of reading intellectual history that is not only concerned with the transmission of concepts but also with the processes of transference mourning and disavowal that inform the relationships between bodies of thought Cognitive and Constructive Psychotherapies

Michael J. Mahoney, PhD,2004-01-01 the entire field of psychological services is moving through a developmental transformation of significant proportions open dialogue regarding its diversity is likely to be one of its saving graces in the centuries to come From the Editor s Conclusion Updated and expanded from the Journal of Consulting and Clinical Psychology Dr Mahoney has assembled an impressive group of top psychologists to focus on current developments in cognitive and constructive psychotherapies The volume traces the evolution of cognitive therapy from its origin in behavior modification through its development and maturation as an integrative system of therapy **Shakespeare's**

**Hyperontology** Harald William Fawcner,1990 Utilizing a number of poststructuralist devices H W Fawcner employs an ontodramatic line of approach in order to suggest that a single hidden pattern of hyperontological suggestion organizes Shakespeare s entire imaginative outlook in Antony and Cleopatra *Critical Complexity* Rika Preiser,2016-07-11 This book is a collection of all the single authored essays by Paul Cilliers published between 1990 2011 Being one of few authors who approached the study of complexity from a philosophical perspective the main themes in these papers explore Qualitative characterization of complexity and the normative implications of studying complex adaptive systems the philosophical and conceptual similarity to post structural approaches how any engagement with complexity leads to a critical engagement with how we do science and design interventions critical and normative implications for how to engage with complex socio political concerns in the world What makes this book unique is that it consolidates a body of work that is distributed over a wide range of academic journals Although his book Complexity and Postmodernism Routledge 1998 remains a cornerstone in the field of complexity studies Cilliers journal essays really explore the application of the theoretical concepts in more depth His ground breaking ideas conceptualized in these essays have served as a continual source of novelty and inspiration in the process of applying complexity thinking to other fields of study **The Militant Historian** Kerry William

Purcell,2024-10-31 This is the first wide ranging analysis of Alain Badiou s use development and transformation of the concept of history Despite the wealth of perspectives now available on how social and cultural practices take shape historicism still appears to be the most dominant The Militant Historian examines this primacy and reveals how Badiou s work offers a radical riposte Exploring key texts in Badiou s oeuvre and how his philosophical ideas disrupt dominant

conceptions of history and the role of the historian Kerry William Purcell addresses how these ideas could transform our approaches to the historical and what it means to do history as a meaningful endeavour Adopting a chronological approach to Badiou's work each chapter explores specific conceptual developments in his writing and how they lend themselves to a reconsideration of the subject who speaks history From these new and disruptive modes of doing emerges the figure of the militant historian a role with the potential to impact how we practice history outside the narrow strictures of academic life

**A Theory of the Tache in Nineteenth-Century Painting** ?stein Sj?ad,2017-07-05 Without question the tache blot patch stain is a central and recurring motif in nineteenth century modernist painting Manet's and the Impressionists rejection of academic finish produced a surface where the strokes of paint were presented directly as patches or blots then indirectly as legible signs C nne Seurat and Signac painted exclusively with patches or dots Through a series of close readings this book looks at the tache as one of the most important features in nineteenth century modernism The tache is a potential meeting point between text and image and a pure trace of the artist's body Even though each manifestation of tacheism generates its own specific cultural effects this book represents the first time a scholar has looked at tacheism as a hidden continuum within modern art With a methodological framework drawn from the semiotics of text and image the author introduces a much needed fine tuning to the classic terms index symbol and icon The concept of the tache as a crossing of sign types enables finer distinctions and observations than have been available thus far within the Peircean tradition The sign crossing theory opens onto the whole terrain of interaction between visual art art criticism literature philosophy and psychology

**From Apology to Utopia** Martti Koskenniemi,2006-02-02 This book presents a critical view of international law as an argumentative practice that aims to depoliticise international relations Drawing from a range of materials Koskenniemi demonstrates how international law becomes vulnerable to the contrasting criticisms of being either an irrelevant moralist Utopia or a manipulable fa ade for State interests He examines the conflicts inherent in international law sources sovereignty custom and world order and shows how legal discourse about such subjects can be

described in terms of a small number of argumentative rules This book was originally published in English in Finland in 1989 and though it quickly became a classic it has been out of print for some years In 2006 Cambridge was proud to reissue this seminal text together with a freshly written Epilogue in which the author both responds to critiques of the original work and reflects on the effect and significance of his deconstructive approach today
