## **Supervision Of Instruction:**

*Supervision for Today's Schools* George E. Pawlas, Peter F. Oliva, 2007-06-29 Specifically designed for the introductory course this text provides an overview of the field of instructional supervision Acquaints students with not only the authors views on supervision but with those of other specialists in the field placing heavy emphasis on practice and the supervisor s responsibilities as an instructional leader Continues to stress that the relationship between the supervisor and teacher is built on trust and that the overall goal is to improve student achievement through better instruction      **Supervision** Peter Burke, Robert D. Krey, 2005 The first edition of this book titled A DESIGN FOR INSTRUCTIONAL SUPERVISION provided a structural framework for an effective program of instructional supervision The basic cognitive thrust of this second edition SUPERVISION A Guide to Instructional Leadership remains the same as the first What has changed is the attention to the detail surrounding the design components References have been updated and streamlined activities have been modified and examples of structure have been created using the current national policy situation as a base Philosophical and historical definitions of supervision are maintained and expanded in this edition It will help professionals with responsibilities for instructional leadership design a supervisory program that fits a local situation by taking advantage of the foundation provided herein Attention is given to the selection of and the interrelationships between those assumptions principles objectives criteria and procedures so that planners of supervisory programs will gain the knowledge and tools necessary to create that structure from this book It also provides a means for schools to have a well conceived carefully designed properly implemented and continuously evaluated plan for the supervision of instruction in order to reply competently to state and federally mandated assessments for students In addition personal perspectives of the authors are presented in each part of the text The book will serve as a guide and provide direction to instructional supervisors directors of services principals administrators at all levels teachers grade level or department chairs and others interested in the management of instruction in the school setting      **Supervision of Instruction** Carl D. Eye, Lanore A. Netzer, 1965 Both those who are beginners and those who have spent many years in studying the purposes and processes of administration may well be intrigued with this book It deals with the heart of all efforts to provide a sound educational program The title itself cuts through the core of the administrative enterprise Administration always has had the responsibility of encouraging maximum accomplishment in both learning and teaching This book is particularly focused on the administrative responsibilities of the instructional program Many books in administration deal mainly with the non instructional tasks and many books in supervision deal with the non managerial tasks But both apparently deal with esoteric tasks which constitute ends rather than means The refreshing and refreshingly different aspects of this book are the amalgamations of instructional and managerial concerns as integral parts of administration Those who wish to question their own professional efforts will find in this book not only an incentive for increased purposeful activities but also an opportunity to structure and appraise their own behaviors as instruments for instructional improvement Introduction John Guy Fowlkes
