**Supply Chain-Based Category Strategies for Global Supply Networks** Nikos Moraitakis,2017-07-26 From a supply chain perspective often big differences exist between global raw material suppliers approaches to supply their respective local markets The progressing complexity of large centrally managed global supply networks and their often unknown upstream ramifications increase the likelihood of undetected bottlenecks and inefficiencies It is therefore necessary to develop an approach to strategically master the upstream complexity of such networks from a holistic perspective in order to align regional competitive priorities and supply chain structures The research is set in the context of polyamide engineering thermoplastics in the automotive industry Based on an initial industry analysis and a literature review a conceptual framework is developed The framework is matched with existing empirical and theoretical literature as well as multiple case study analyses in the relevant supply market and a centrally managed global supply network As a result strategic group theory is transferred into the supply network management context to allow for the consideration of upstream supply chain structures in the category strategy development process The proposed approach introduces strategic groups of supply chains as a segmentation criterion for complex global supply networks which enables the network wide alignment of competitive priorities flexibility requirements and partnerships with suppliers Supply chain based category strategies can effectively reduce the complexity firms are facing in this context The results of this research are applicable for certain types of global supply networks and can be used for network alignment and strategy development The approach can furthermore generate valuable insights useable for negotiation support with suppliers

*A Network Approach in Strategic Management: Emerging Trends and Research Concepts* Beata Barczak,Tomasz Kafel,Pierpaolo Magliocca,2021 PURPOSE The analysis of the literature shows that the attempts to conceptualize the strategic aspects of the network bring a significant impact on the development of research on organizational networks This article aims to analyze the new trends in strategic management and in particular on the possibility of exploring the network approach in strategic

management through the existing literature and the presentation of the new contributions of the following articles published in the current issue

**METHODOLOGY** The article is descriptive in character thus it is based on a literature review and its constructive critics A narrative literature review was used to present the main assumptions and features of the network approach in strategic management along with an indication of emerging trends and new directions Also the identification of theoretical foundations for understanding the processes of strategic change in inter organizational networks and the proposition of the way to understand network strategy were presented

**FINDINGS** The research included in this issue shows that from a network perspective business strategy plays an important role in guiding the development of individual relationships and networks Exploring the network approach in strategic management allows one to adopt the category of network strategy which can be described through the coexistence of cooperation and competition

**IMPLICATIONS FOR THEORY AND PRACTICE** Considerations lead to the conclusion that the business strategy must be expressed in terms of potential changes in the network in which the company operates taking into account its current and selected position in the network Despite the fact that the current state of research on organizational networks in the theory of strategic management shows that this approach is already quite well established on the basis of the analysis of research results concerning the conceptualization of strategic aspects of the network the existing problems and limitations were identified

**ORIGINALITY AND VALUE** The main problems related to the exploration of the network approach and the resulting consequences for the definition of the network strategy were indicated Also the combination of an organizational and economic approach with the logic of competitive advantage and relational annuity The demonstration that the network perspective in strategic management allows for a more complete understanding of the strategic behavior of modern enterprises

**International Business Strategy** Peter J Buckley, Pervez Ghauri, 2015-02-20 With stagnated demand in many home economies the need to internationalize and exploit foreign market opportunities has never been more paramount for businesses to succeed at a global level. However this process raises a number of questions such as can firms use their knowledge of one market in the next. Can firms pursue internationalization on several fronts at the same time? How should firms handle cultural and institutional differences between markets? This textbook provides students with the core research in international business and strategy including organization efficiency external relationships and the challenges found in an increasingly multicultural world. Each part begins with a presentation of the issues and controversies faced in that particular area followed by a synthesis of the research which provides avenues for future research. To facilitate and encourage further debate and learning each part also includes at least one original case study. Compiled by two of the World's leading scholars of international business and supplemented with critical commentaries and a range of integrative case studies this comprehensive textbook provides advanced students of international business and strategy with a resource that will be invaluable in their studies and beyond.

Strategic Operations Management Robert H. Lowson, 2003-08-29 This indispensable text offers students a high quality treatment of strategic operations management. It provides the reader with a clear understanding of the importance and nature of operations strategy by determining exactly which management activities core competencies resources and technologies underpin an operational strategy. The book demonstrates how various operational elements and components can be combined and customised into unique operational strategies. When these strategies are correctly implemented they provide sustainable competitive advantage and allow firms to provide a diverse range of services and goods in their increasingly demanding complex and dynamic marketplaces and spaces. Includes

chapters covering customising operational strategies for retail manufacturing services and SMEs and sections on eBusiness and complexity theory in relation to operations theory Features include extended case studies including several from Europe and the USA case vignettes learning objectives key terms chapter introduction and maps to aid reader accessibility time out boxes to prompt the reader to reflect on what has been learnt critical reflection boxes that analyse theories and models

*Corporate Social Capital and Liability* Roger Th.A.J. Leenders,Shaul M. Gabbay,2013-03-09 In studies of inter organizational relations IOR s there is a tendency to look at dyads of firms and to consider networks as aggregates of such dyads But there are several roles for a third party a go between This chapter looks at a go between not in the sense of a middleman who intermediates in existing production or trade such as an agent wholesaler retailer and not in the sense of an entrepreneur who intermediates in the realization of new potential in connecting supply and demand It looks at a go between in the sense of a relationship counsellor for the development and maintenance of social capital providing support in setting up adapting and ending cooperative relations between others Or in yet different terms to help in the embedding of relations in Granovetter s 1985 sense Uzzi 1997a Such roles may be performed by middlemen or entrepreneurs but also by specialized agents who do not play a direct role in linking stages in a chain of production and distribution as middlemen and entrepreneurs typically do Indeed some of the roles require an independence that is served by not having a direct stake in the relations that need to be developed I propose that the analysis yields a perspective for looking at the roles of trade and industry associations in European business systems and of banks and trading houses in Japanese enterprise groups Kigyo Shudan
