**The Supreme Court and Patents and Monopolies** Philip B. Kurland, 1975-10 The papers in this collection are drawn from the annual The Supreme Court Review which since its inception in 1960 has been regarded by such legal scholars as Robert F Drinnan S J as An indispensable universally quoted work of the highest scholarship regarding the world s most influential tribunal Now some of the most important contributions to the Review have been brought together in paperback editions that focus on issues that are becoming increasingly relevant to the ordinary citizen s daily life      **Monopolies and Patents** Harold G. Fox, 1947-12-15 Harold G Fox is a native of Toronto and a graduate of the University of Toronto and the Law School of Osgoode Hall For some years he practised patent and trade mark law as a member of the firm of Fetherstonhaugh Fox In the nineteen twenties he was invited to take over the management of the Canadian zipper industry and since that time has devoted his main energies to the development of that business But while he is identified today as a competent industrial executive he is also recognized as an authority in his special field of patent trade mark and copyright law in which he has continued to take a deep interest He believes that a lawyer makes a good businessman He has therefore pursued not only the academic aspect of his profession but has kept an intimate contact with it both as counsel and as writer He is the author of several standard text books on Canadian law Canadian Patent Law and Practice 1937 The Canadian Law of Trade Marks and Industrial Design 1940 and The Canadian Law of Copyright 1944 He is the editor of Fox s Patent Trade Mark and Copyright Cases now in its sixth volume and is a considerable contributor to legal periodicals in this country and in the United States He was appointed King s Counsel in 1937 and is a Fellow and some time President of the Patent Institute of Canada He holds the honorary appointment in the University of Toronto Lecturer in the Law of Industrial Property and in 1945 in recognition of his contributions to Canadian legal scholarship the University conferred on him the honorary degree of Doctor of Letters Dr Fox has decided views on the benefits which are conferred on the industrial and commercial life of a country and indeed on the public generally by a strong patent system efficiently administered In his view the modern patent of invention is not a monopoly in the sense in which that word is generally understood He feels that the modern witch hunt against monopolies is misdirected when it levels its attack on the patent system and predicates the opinion that if the history of monopolies were better understood much of the antagonism against them would tend to disappear It is an exponent of this view that he examines in this work the reasons for the institution and development of monopolies the factors which contributed to their growth in England in the sixteenth and seventeenth century and the cause of their gradual decline and transition into the modern patent of invention The approach to the subject is not however merely antiquarian In his opinion the patent system can be improved in the interests not only of the inventor but also of the public With this thought in mind he proposes an amendment to the patent system designed to eliminate the indefinable element of inventive ingenuity from the content of patentability a reform which would remove much of the uncertainty of result which in the past has been the main

fault of the patent system and the chief curse of the inventor and patentee In this work Dr Fox demonstrates an attitude toward monopolies and patents which reflects both his legal training and research and his practical industrial experience Whether one agrees with his interpretation of the history of monopolies and his proposal for amendment of the patent system or not this book will evoke much interest and possible controversy **American Patent System** United States.
