La religion est l'ensemble des croyances et des pratiques collectives relatives au sacré. Les religions sont l'ensemble des institutions qui organisent les pratiques culturelles et les croyances collectives. **Catalogue Or Alphabetical Index of the Astor Library** Astor Library, 1859      Scepticism in the Eighteenth Century: Enlightenment, Lumières, Aufklärung Sébastien Charles, Plínio J. Smith, 2014-07-08 The Age of Enlightenment has often been portrayed as a dogmatic period on account of the veritable worship of reason and progress that characterized Eighteenth Century thinkers Even today the philosophes are considered to have been completely dominated in their thinking by an optimism that leads to dogmatism and ultimately rationalism However on closer inspection such a conception seems untenable not only after careful study of the impact of scepticism on numerous intellectual domains in the period but also as a result of a better understanding of the character of the Enlightenment As Giorgio Tonelli has rightly observed the Enlightenment was indeed the Age of Reason but one of the main tasks assigned to reason in that age was to set its own boundaries Thus given the growing number of works devoted to the scepticism of Enlightenment thinkers historians of philosophy have become increasingly aware of the role played by scepticism in the Eighteenth Century even in those places once thought to be most given to dogmatism especially Germany Nevertheless the deficiencies of current studies of Enlightenment scepticism are undeniable In taking up this question in particular the present volume which is entirely devoted to the scepticism of the Enlightenment in both its historical and geographical dimensions seeks to provide readers with a revaluation of the alleged decline of scepticism At the same time it attempts to resituate the Pyrrhonian heritage within its larger context and to recapture the fundamental issues at stake The aim is to construct an alternative conception of Enlightenment philosophy by means of philosophical modernity itself whose initial stages can be found herein      *The Modernist Imagination* Martin Jay, 2009 Some of the most exciting and innovative work in the humanities is occurring at the intersection of intellectual history and critical theory This volume includes work from some of the most prominent contemporary scholars in the humanities      **Religion Dans L'histoire** Michel Despland, Gérard Vallée, Canadian Corporation for Studies in Religion, 1992-03-03 The history of the concept of religion in Western tradition has intrigued scholars for years This important collection of eighteen essays brings further light to the ongoing debate Three of the invited participants W C Smith M Despland and E Feil have each previously written impressive books treating this subject the last two acknowledged the impact and continuing influence of Smith's work The Meaning and End of Religion An introduction and a recapitulation of Smith's contribution as a scholar set the stage for a retrospective look at the published literature Contributors then examine the transformation of words the classical religio to the modern religion particularities of religion in nineteenth century France Troeltsch's concept of religion the study of religion from an Asian point of view and the categorization of World Religions The concluding essays elaborate contemporary anthropological cross disciplinary semiological deconstructive and psychoanalytical methodological approaches to the concept and study of religion Exploring critically different aspects of the concept and study of religion these provocative essays typically reflect the methodological

Cerny, 2012-12-06 The Character of Seventeenth Century French Protestantism and the Place of the Huguenot Refuge following the Revocation of the Edict of Nantes Thirty seven years ago the late Emile G Leonard regretted that there were so few historical studies of seventeenth century French Protestantism and no general 1 historical synthesis for the period as a whole At the time Leonard s observation was accurate Seventeenth century French Protestantism traditionally remained a questionable and problematical subject for historians All too frequently historians neglected it in favor of emphasizing its origins in the second half of the sixteenth century and its renascence since the French Revolution When the rare historian broke his silence and considered French Protestantism in the seventeenth century was meager and generally ambivalent or negative The historiographer his treatment of seventeenth century French Protestantism could only cite the outstanding works of Jean Pannier and Orentin Douen which taken together emphasized the new pre eminence of Parisian Protestantism in the seventeenth century and the genuine works of synthesis by John Vienot and Matthieu Lelievre which again had to be placed side by side in order to complete coverage of the whole of the seventeenth 2 century The only true intellectual history of seventeenth century French Protestantism was the study by Albert Monod which however dealt with the second half of the century and then only in the broad context of both Protestant 3 and Catholic thought responding to the challenge of modern rationalism      **Religion, Colonization and Decolonization in Congo, 1885-1960. Religion, colonisation et décolonisation au Congo, 1885-1960** Vincent Viaene, Bram Cleys, Jan De

Maeyer, 2020-10-30 Religion in today's Democratic Republic of Congo has many faces from the overflowing seminaries and Marian shrines of the Catholic Church to the Islamic brotherhoods from the healers of Kimbanguism to the televangelism of the booming Pentecostalist churches in the great cities from the Orthodox communities of Kasai to the invisible Mai Mai warriors in the brousse of Kivu. During the colonial period religion was no less central to people's lives than it is today. More surprisingly behind the seemingly smooth facade of missions linked closely to imperial power faith and worship were already marked by diversity and dynamism tying the Congo into broader African and global movements. The contributions in this book provide insight into the multifaceted history of the interaction between religion and colonization. The authors outline the institutional political framework and focus on the challenge that old and new forms of slavery entailed for the missions. The atrocities committed at the time of the Congo Free State became an existential question for young Christian communities. In the Belgian Congo after 1908 more structural forms of colonial violence remained a key issue marking religious experiences. And yet religion also acted as a bridge. The authors emphasize the role intermediaries such as catechists or medical assistants played in the African appropriation of Christianity. They examine the complex interaction with indigenous religious beliefs and practices and zoom in on the part religions played in the independence movement as well as on their reaction to independence itself. Coming at a moment when Belgium confronts its colonial past this volume provides a timely reassessment of religion as a key factor.
