A. Mel??uk,Igor· A. Mel·?uk,Igor? Aleksandrovi? Mel??uk,1988-01-01 This work presents the first sustained examination of Dependency Syntax In clear and stimulating analyses Mel cuk promotes syntactic description in terms of dependency rather than in terms of more familiar phrase structure The notions of dependency relations and dependency structure are introduced and substantiated and the advantages of dependency representation are demonstrated by applying it to a number of popular linguistic problems e g grammatical subject and ergative construction A wide array of linguistic data is used the well known Dyirbal the less known Lezgian and the more recent Alutor Several exotic cases of Russian are discussed to show how dependency can be used to solve difficult technical problems The book is not only formal and rigorous but also strongly theory oriented and data based Special attention is paid to linguistic terminology specifically to its logical consistency The dependency formalism is presented within the framework of a new semantics oriented general linguistic theory Meaning Text theory **Dependency in Linguistic Description** Alain Polguère,Igor A. Mel☐?uk,2009-02-18 The book covers three major topics crucial for contemporary syntactic research Firstly it offers a sketch of a general theory of dependency in natural language Different types of linguistic dependencies are distinguished semantic syntactic and morphological the criteria for their recognition are formulated and all possible combinations are discussed in some detail Secondly it demonstrates the application of the general theory in two specific domains establishing the system of Surface Syntactic Relations in French and linear positioning of clitics in Serbian Thirdly it presents a formal sketch of Head Driven Phrase Structure Grammar

Koerner,Hans-Josef Niederehe,Kees Versteegh,2008-07-14 Volume 2 treats in great detail and at times quite innovatively the individual stages of development of the study of language as an autonomous discipline from the growing awareness in 17th and 18th century Europe of genetic relationships among a host of languages to the establishment of comparative historical Indo European linguistics in the 19th century from the generation of the Schlegels Bopp Rask and Grimm to the Neogrammarians and the application of the comparative method to non Indo European languages from all over the globe Typological linguistic interests first synthesized by Humboldt as well as the development of various other non historical endeavours in the 19th and the first half of the 20th century such as language and psychology semantics phonetics and dialectology receive ample attention **Serbian Clitics** Jasmina Milićević,2023-02-10 Clitics those funny little words like English contracted future tense and pluperfect tense conditional mood markers ll and d or French pronominal objects le him la her lui to him her etc have long been a source of fascination for linguists Lacking an inherent stress that characterizes well behaved words clitics prosodically depend on a stressed sentence element called their host which makes them look and in some contexts behave like affixes parts of words Some clitics Serbian second position clitics being the case in point also obey stringent linear ordering rules different from those holding for fully fledged sentence elements This monograph offers a comprehensive formalized description of second position clitics in standard Serbian from the viewpoint of the Meaning Text theory an approach relying on syntactic dependencies and oriented towards speech production which sets it apart from most contemporary frameworks It will be of interest for general linguists Slavists and advanced learners of Serbian *Semantics* Igor A. Mel□?uk,2012-06-06 This book presents an innovative and novel approach to linguistic semantics beginning with the idea that language can be described as a system for the expression of linguistic Meanings as particular surface forms or Texts Semantics is specifically that system of rules that ensures a correct transition from a Semantic Representation of the Meaning of a family of synonymous sentences to the Deep Syntactic Representation of a particular sentence Framed in the terms of Meaning Text linguistics this volume discusses in detail the problems of Semantic Representation including the semantic structure of utterances the semantics of Causation in English and communicative or information structure Based on the author s life long dedication to the study of the semantics and syntax of natural language this book is a paradigm shifting contribution to the language sciences whose originality and

daring will make it essential reading for linguists anthropologists semioticians and computational linguists **Semantics** Igor? Aleksandrovi? Mel??uk,Igor A. LaPolla,1997-12-11 An introduction to syntactic theory and analysis A Dependency Grammar of English Timothy Osborne,2019-07-15 Dependency grammar DG is an approach to the syntax of natural languages with a long and venerable

tradition yet awareness of its potential to serve as a basis for principled analyses of natural language syntax is minimal due to the predominance of phrase structure grammar PSG This book presents a DG of English with two main goals in mind The first is to make the principles of dependency syntax accessible to a general audience so that the novice linguist as well as the seasoned syntactician becomes fully aware of what makes DG unique as an approach to the study of natural language syntax The second is to present and develop a version of DG that then serves as a principled basis for the investigation of central areas of the syntax of English such as long distance dependencies coordination ellipsis valency etc An overarching theme in all this is that DG is simple compared to PSG yet despite this simplicity it is quite effective at shedding light on the nature of syntactic phenomena **Text, Speech and Dialogue** Vaclav Matousek,Pavel Mautner,2003-12-01 This book constitutes the refereed proceedings of the 6th International Conference on Text Speech and Dialogue TSD 2003 held in Cesk Budejovice Czech Republic in September 2003 The 60 revised full papers presented together with 2 invited contributions were carefully reviewed and selected from 121 submissions The papers present a wealth of state of the art research and development results in the field of natural language processing with an emphasis on text speech and spoken language ranging from theoretical and methodological issues to applications in various fields such as web information retrieval the semantic web algorithmic learning and dialogue systems **Syntax - Theory and Analysis.
