International Practice in Cardiothoracic Surgery Wu Ying-kai, Richard M. Peters, 2012-12-06. Surgery has been impressive during the past two decades. Surgeons from many countries have accumulated outstanding experiences which are both unique and varied. With the aim of promoting international exchange of scientific and technical accomplishments in cardiothoracic surgery, we began in 1982 to consult with a number of leading cardiothoracic surgeons about compiling a book that would permit them to present their expertise. Through the untiring efforts of all the authors and sectional editors during the past three years, *International Practice in Cardiothoracic Surgery* is now published both in an English language edition and in a Chinese language edition. There are one hundred and eleven chapters in eight sections contributed by over a hundred authors from Brazil, Canada, China, England, France, Germany, Finland, Japan, New Zealand, Sweden, Switzerland and the United States of America. This book is not intended to be a textbook but a compilation of

current views and techniques from cardiothoracic surgeons with unique experiences who have made significant contributions in certain subjects. No uniformity in format was requested. A certain amount of overlapping and even conflicting ideas are purposely collected to express the international character of the book. We appreciate the warm support, cooperation and hard work of all the authors, translators, sectional editors and secretarial workers in completing the book.

The Ethics of Surgery Robert M. Sade, 2015 According to popular belief technical skill is far more important for surgeons than thoughtful deliberation Nothing could be further from the truth Although surgeons must sometimes make decisions rapidly on the basis of incomplete evidence and must respond to unexpected catastrophes in the operating room rapidly those events are intermittent most of the time surgeons deliberate on diagnostic problems and thoughtfully manage postoperative care which is often intellectually challenging The relationship of surgeons with their patients is in a real sense far more intimate and trusting than that of any other professional a claim that is supported by the fact that patients surrender their bodies to

their surgeons in a state of total helplessness and vulnerability when they undergo anesthesia Because of that responsibility no other professional group has a greater sense of dedication to the welfare of their patients than surgeons Surgical culture is deeply steeped in ethics and surgeons confront and resolve ethical dilemmas as much or more than most other professionals although they often may not recognize the situations they resolve are problems in ethics they are just part of the daily routine This book is a compendium of articles from the recent surgical literature that address ethical issues chosen by surgeons because they are controversial and pertinent to the practice of surgery The reader will not find a great deal of sophisticated dissection of fine philosophical distinctions in these discussions of ethical conflicts and controversies in surgery Instead they will discover differing viewpoints from thoughtful essayists mostly surgeons whose feet are firmly in contact with the ground and who have extensive experience in the real world of surgery medicine and law

The Ethics of Surgical Practice James W. Jones, Laurence B. McCullough, Bruce W. Richman, 2008 This volume provides a collection of case studies representing a wide range of the ethical issues surgeons confront today This excellent text for academic courses in surgical ethics is a fascinating read for practicing surgeons The editors guide us through 60 brief realistic and ethically complex problems offering a series of five possible resolutions to each and guiding us through the relative benefits and weaknesses of the options until a best ethical choice is arrived at The volume includes sections on Consent and Disclosure Self Regulations Research and Innovation Conflicts of Interest Business Dealings and End of Life Issues each with a brief introduction by the editors
