Surgical Oncology Controversies In Cancer Treatment:

Current Controversies in Cancer Care for the Surgeon Katherine A. Morgan, 2015-12-31 Over the past decade major advances have occurred in the management of the many fields of cancer treatment encountered by the general surgeon. These developments have evolved from improved understanding of disease biology, high level clinical outcomes studies as well as translational research with new available therapies. These advances have brought major changes to cancer care and have surfaced new dilemmas in clinical decision making. Modern cancer management requires an understanding of the current status of a diverse array of oncologic diseases. *Current Controversies in Cancer Care for the Surgeon* provides a comprehensive update on the management of various cancers as interpreted by recognized experts in the field. In addition, each chapter will focus on current controversies and areas of advance. The text is designed to assist the practicing surgeon in achieving optimal management of encountered oncologic problems. Such an inclusive text will be an invaluable resource for clinical surgeons, surgeons in training, students and researchers.

Current Catalog National Library of Medicine (U.S.), 1982. First multi-year cumulation covers six years 1965-70. *Controversies in the Management of Gynecological Cancers* Jonathan A. Ledermann, Carien L. Creutzberg, Michael A. Quinn, 2013-12-13 This is a novel text that highlights the controversial areas in the management of gynecological cancers. None of the topics in this book have definitive answers; they represent the everyday decision making facing gynecologists, oncologists, radiologists, pathologists and other health professionals treating women with these conditions. This book is not to be used as a traditional textbook; it is a text that specialists and trainees will use to help them weigh up the arguments that exist in a variety of areas in the treatment of gynecological cancers. Each chapter will have two or more authors selected either for their opposing views or for their ability to provide an opposite view or opinion to the other. The content will be evidence-based, illustrating contrasting evidence and scientific opinion in the literature. Each chapter will close on a summary indicating the direction of research needed to address the issues being discussed.

Controversial Issues in the Management of Head and Neck Cancer: A Swiss

Multidisciplinary and Multi-Institutional Patterns of Care Study Olgun Elicin,Marco Siano,Christian Simon,2020-02-26 The heterogeneity in the practice of diagnosis and treatment of head and neck squamous cell carcinoma HNSCC is known and expected to be inversely correlated with the level of evidence on a given topic Literature on various aspects of management of HNSCC were previously published but were usually restricted within narrow foci Due to the lack of a similar comprehensive work published so far the Head and Neck Cancer Working Group of Swiss Group for Clinical Cancer Research SAKK decided to perform a survey covering the whole spectrum of controversial topics concerning the diagnosis and the treatment of HNSCC among its member institutions This survey was designed to discuss current diagnostic and treatment strategies for HNSCC of all localizations and to find out probable differences and level of consensus between the participating academic institutions by means of a questionnaire based pattern of care study The items in the survey was generated with a scored voting system by inclusion of all involved centers and divided into four sections each of them not exceeding twenty questions head and neck surgery radiation oncology medical oncology and biomarkers Surely the topics and questions were intentionally chosen from controversial areas Nonetheless the lack of major consensus in most queried areas provide an insight to head and neck oncologist in terms of the scope of heterogeneity in their practice Although none of the participated centers being plainly wrong it is still disturbing to see that a patient may be treated with quite discrepant diagnostic and treatment concepts even in a relatively small country adhering to up to date evidence based medicine We believe that this work will serve the head and neck oncologists to be aware of their discrepancies and to stimulate discussion toward standardization of practice and prioritize topics of future clinical research [National Library of Medicine Current Catalog](#) National Library of Medicine (U.S.), *Controversies in the Local Management of Lung Cancer* John M. Management of Infectious Complication in Cancer Patients Gary A. Noskin, 2007-11-23 Infection is a major cause of morbidity and mortality in patients with neoplastic disease because of compromised host defenses These defects result in an increased risk of infection and its complications The nature of the underlying malignancy the immunodeficiencies associated with it and the treatments directed against it are all important determinants of infection In recent years the introduction of more intensive chemotherapeutic regimes and the widespread use of bone marrow and peripheral stem cell transplantation have changed the pattern of infection in many patients Furthermore the increasing use of central venous access devices and antimicrobial prophylaxis has changed the epidemiology of infection in these patients as well The goal of this volume in the Cancer Treatment and Research series is to emphasize that while the management of infection in cancer patients is common it is constantly changing With the increasing complexity of these patients optimal management requires a multidisciplinary approach Ultimately it is hoped that this book will assist clinicians in the diagnosis management and prevention of infection in order to optimize care for patients with cancer
