Thinking in Cases Markus Asper,2020-01-20 Who is afraid of case literature In an influential article Thinking in Cases 1996 John Forrester made a case for studying case literature more seriously exemplifying his points mostly with casuistic traditions of law Unlike in modern literatures case collections make up a significant portion of ancient literary traditions such as Mesopotamian Greek and Chinese mostly in medical and forensic contexts The genre of cases however has usually not been studied in its own right by modern scholars Due to its pervasiveness case literature lends itself to comparative studies to which this volume intends to make a contribution While cases often present truly fascinating epistemic puzzles in addition they offer aesthetically pleasing reading experiences due to their narrative character Therefore the case understood as a knowledge transmitting narrative about particulars allows for both epistemic and aesthetic approaches This volume presents seven substantial studies of cases and case literature Topics touched upon are ancient Greek medical forensic philosophical

and mathematical cases medical cases from imperial China and 20th century American medical case writing The collection hopes to offer a pilot of what to do with and how to think about cases
