This book will be prepared by the Brazilian Department for Academic Leagues of Cardiovascular Surgery within the Brazilian Society of Cardiovascular Surgery (BSCVS). This department is the section within BSCVS that consists of the academic leagues of cardiovascular surgery from each university throughout the country. In Brazil, medical academic leagues are organizations that gather students, interns, and residents to discuss a certain topic and promote research and teaching-oriented extra-class activities supervised by a group of professors. Thus, trainees will have involvement in writing the chapters, and the senior professor supervisors will edit and finalize the work. Basically, each chapter is written by an intern or resident and ultimately his/her supervisor. As the book's volume editors, doctors Almeida and Jatene will have final responsibility for the cases and overall manuscript.

*Cardiothoracic Surgery in the Elderly* Mark R. Katlic, 2011-05-04

*Cardiothoracic Surgery in the Elderly: Evidence Based Practice* is an important and timely book that reflects the thoughtful work of pioneers in geriatric surgery. It encompasses their knowledge related to geriatric surgery and their reflections and guidance on the rapidly accumulating knowledge related to improving the health and surgical care of seniors. This book provides a scholarly review of the constantly expanding knowledge base about cardiovascular and thoracic surgery in seniors. The book follows a logical sequence covering general aspects of care, cardiac surgery, and thoracic surgery. Chapters are focused on common devastating and often missed complications of surgical care in the seniors. These include delirium, depression, pressure sores, functional losses, incontinence, volume depletion, and asymptomatic or atypical complications: myocardial infarction, post-operative diarrhea, urinary tract infections, and pneumonia. Each is expertly reviewed. Strategies to help the surgeons and the surgical team anticipate, recognize, and effectively prevent or manage such problems are discussed, and the evidence basis for such strategies is provided.

*Cardiothoracic Surgery in the Elderly: Evidence Based Practice* is particularly timely and the first to review the substantial body of knowledge that has been developed in recent years related to geriatric cardiothoracic surgical problems. It catalogs well the expanding knowledge basis for achieving successful surgical outcomes in the very old. It provides a most useful resource for cardiovascular/thoracic surgeons in training and those already in practice.
