The Geography Of Crime And Justice Mcgraw Hill Problems Series In Geography:

The Geography of Crime and Justice Keith D. Harries, 1973 **A Guide to Information Sources in the Geographical Sciences** Stephen Goddard, 1983-01-01 Geography is a wide ranging discipline and the number of information sources available is truly enormous These include printed books and journal articles maps satellite photographs archives statistical information and much else One particular problem facing geographers is that when one studies a foreign country information may be available only in the foreign country and difficult to obtain This book discusses the information sources available to geographers *International Perspectives on Crime and Justice* K. Jaishankar, 2009-05-27 In a world of growing interdependence crimes are no longer confined by national boundaries In this context the necessity to understand criminological developments across the globe becomes imperative This book aims to offer cross cultural perspectives of different criminological issues and criminal justice systems operating worldwide This book emphasizes the collective understanding of criminological problems from an international perspective This book is a quintessence of contemporary criminological developments with a global outlook The book is an edited volume of articles collected from criminologists all over the world It is a peer reviewed collection The chapters focuses on various criminological issues such as Bullying Child abuse Corrections Institutional and Community Cyber crimes Corporate crime Corruption Costs of crime Crime Analysis Crime prevention Crime Mapping and GIS Criminal justice systems Environmental crime Ethnic communal caste conflicts Family violence Fear of crime High tech crimes Homicide Human trafficking Juvenile Delinquency Organized crime Offenders including women offenders Policing Prisons Public attitudes Restorative justice Sexual assault Stalking Theories of crime Transnational crime Victimology Violence White collar crime and Workplace violence The book aims to provide theoretical frameworks and pragmatic discussions on Criminology and Criminal Justice It is intended for Academics Criminal Justice professionals and Graduate Students who want to improve their understanding of the issues and challenges that arise when issues related to criminology and criminal justice cross national boundaries Also practitioners and academics of allied fields like sociology psychology geography political science public administration and forensic sciences whose research interests include either crime criminal justice system Victim or crime analysis will find this book useful The comprehensive framework of this book means that it provides a rich variety of international perspectives on an array of crime and justice related issues The thirty chapters presented here are a treasure trove of insights in terms of both topical variety and approaches within topic Dr Jaishankar has assembled a valuable collection of readings that will find broad acceptance internationally Prof Keith Harries From the Foreword **Review of Public Data Use** ,1978 Inequality, Crime and Public Policy (Routledge Revivals) John Braithwaite, 2013-09-13 First published in 1979 Inequality Crime and Public Policy integrates and interprets the vast corpus of existing research on social class slums and crime and presents its own findings on these matters It explores two major questions First do policies designed to redistribute wealth and power within capitalist

societies have effects upon crime Second do policies created to overcome the residential segregation of social classes have effects on crime The book provides a brilliantly comprehensive and systematic review of the empirical evidence to support or refute the classic theories of Engles Bonger Merton Cloward and Ohlin Cohen Miller Shaw and McKay amongst many others Braithwaite confronts these theories with evidence of the extent and nature of white collar crime and a consideration of the way law enhancement and law enforcement might serve class interest

Measuring Crime and Criminality John MacDonald,2017-09-08 Measuring Crime and Criminality focuses on how different approaches to measuring crime and criminality are used to test existing criminological theories Each chapter reviews a key approach for measuring criminal behaviour and discusses its strengths or weaknesses for explaining the facts of crime or answers to central issues of criminological inquiry The book describes the state of the field on different approaches for measuring crime and criminality as seen by prominent scholars in the field Among the featured contributions are The Use of Official Reports and Victimization Data for Testing Criminological Theories The Design and Analysis of Experiments in Criminology and Growth Curve Mixture Models for Measuring Criminal Careers Also included are papers titled Counterfactual Methods of Causal Inference and Their Application to Criminology Measuring Gene Environment Interactions in the Cause of Antisocial Behaviour and What Has Been Gained and Lost through Longitudinal Research and Advanced Statistical Models This volume of Advances in Criminological Theory illustrates how understanding the various ways criminal behaviour is measured is useful for developing theoretical insights on the causes of crime

Social, Ecological and Environmental Theories of Crime Jeffery T. Walker,2017-07-05 One of the oldest and most extensive forms of criminology falls within what is referred to among other names as social ecology Beginning with the work of Guerry and Quetelet this theory became the dominate paradigm in explaining crime with the work of the Chicago School in the early 1900s social disorganization theory and neighborhood research attempting to deal with crime in deteriorating cities Social ecology is also the basis for the research being conducted in environmental criminology This volume offers a selection of the most influential works in social ecology and environmental criminology It begins with research from human ecology and the Chicago School extending through some of the research in social disorganization theory It encompasses some of the major journal articles from the 1980s and 1990s in neighborhoods and crime and then addresses some of the quintessential works in environmental criminology It ends with groundbreaking work in this area that may indicate the future direction of the field This valuable collection includes an excellent introduction by Jeff Walker

Crime and Environment R. N. Davidson,2019-03-11 Originally published in 1981 This book unifies the diverse literature on the role of environmental factors in the uneven distribution of crime in society and provides an assessment of the validity of environmental explanations and their utility It analyses and assesses the major work done by researchers in Britain America and elsewhere The extent of the differences between communities is reviewed from a number of perspectives Offences are examined by location nature and seriousness Offenders are located in their environment

and variations according to sex age race social class and recidivism are considered The risks of victimisation also reflect environmental differences and need to be set in the context of wider community perceptions fears and attitudes to crime The role of the community in the distribution of justice is also discussed **The Geography of Crime and Justice** Keith D. Harries, 1973 **Breaking Rules: The Social and Situational Dynamics of Young People's Urban Crime** Per-Olof H. Wikström, 2012-05-24 Breaking new ground in the study of crime in urban environments *Breaking Rules The Social and Situational Dynamics of Young People's Urban Crime* examines the findings theoretical basis and new methodology of The Peterborough Adolescent and Young Adult Development Study PADS This major longitudinal study investigates the role of the social environment on crime causation involving a cohort of 700 young people from the age of 12 A particular aim of PADS is to employ a new theory known as Situational Action Theory as well as the innovative methodology of econometrics combined with space time budgets to improve the study of young people's offending and its changes By reviewing the current literature and analysing the theoretical and methodological problems of previous research the book explains how Situational Action Theory can help overcome central problems in criminological theorising Using this new and innovative framework it presents an analysis of the urban structure of Peterborough and its correlation to the differences in social life found in that area The variations in the urban environment are examined in terms of crime victimization and fear of crime and a detailed examination of young persons crime and its spatial patterns is offered through the unique space time budget data collected within PADS that enables analyses of young people their movements and crime involvement With implications for policy and prevention as well as being the first study of its kind this book should be of great interest to policy makers and practitioners interested in issues of urban environments as well as those studying crime in the urban environment and the role of the social environment in crime causation
