The Geography Of Peace And War:

The Geography of Peace and War David Pepper, Alan Jenkins, 1985 **The Geography of War and Peace** Colin Flint, 2005 Our world of increasing and varied conflicts is confusing and threatening to citizens of all countries as they try to understand its causes and consequences This book takes advantage of a diversity of geographic perspectives as it analyzes the political processes of war and their spatial expression **The Geography of War and Peace : From Death Camps to Diplomats** Colin Flint Professor of Geography Pennsylvania State University, 2004-09-24 How and why war and peace occur cannot be understood without realizing that those who make war and peace must negotiate a complex world political map of sovereign spaces borders networks and scales This book takes advantage of a diversity of perspectives as it analyzes the political processes of war and their spatial expression Topics include terrorism nationalism religion drug wars water conflicts diplomacy peace movements and post war reconstruction **Geographies of Peace and Armed Conflict** Audrey Kobayashi, 2013-09-13 This collection addresses the impact of armed conflict and explores pathways to peace across the world Topics range from geopolitics to the effects of armed conflict on the environment resources health children and transnational migration Others explore the social processes involved in post conflict situations and others still the lessons for achieving effective peace The geographical concepts addressed include the notion of conflict space landscapes of terror the relationship between violence and justice the conditions for peace and the dynamics of post conflict Methods include landscape analysis interviews with a range of citizens mapping and geographic information science and policy analysis Several papers address the situation of children in conflict zones the impact of conflict on patterns of migration the role of gender in achieving peace the concept of territory as a basis for conflict and for negotiation of peace as well as the economic impact of conflict The studies cover several world regions including Africa the Middle East South and Southeast Asia and eastern Europe This book was originally published as a special issue of Annals of the Association of American Geographers

The Geography of the Peace Nicholas John Spykman, 1944 **Geographies of Peace** Fiona McConnell, Nick Megeran, Philippa Williams, 2014-06-20 From handshakes on the White House lawn to Picasso's iconic dove of peace the images and stereotypes of peace are powerful widespread and easily recognizable Yet if we try to offer a concise definition of peace it is altogether a more complicated exercise Not only is peace an emotive and value laden concept it is also abstract ambiguous and seemingly inextricably tied to its antithesis war And it is war and violence that have been so compellingly studied within critical geography in recent years This volume offers an attempt to redress that balance and to think more expansively and critically about what peace means and what geographies of peace may entail The editors begin with an examination of critical approaches to peace in other disciplines and a helpful genealogy of peace studies within geography The book is then divided into three sections The opening section examines how the idea of peace may be variously constructed and interpreted according to different sites and scales The chapters in the second section explore a remarkably

wide range of techniques of peacemaking This widens the discussion from the archetypical image of top down diplomatic state led initiatives to imperial boundary making practices grassroots cultural identity assertion boycotts self immolation ex paramilitary community activism and protective accompaniment The final section shifts the scale and focus to everyday personal relations and a range of practices around the concept of coexistence In their concluding chapter the editors spell out some of the key questions that they believe a geography of peace must address What spatial factors have facilitated the success or precipitated the failure of some peace movements or diplomatic negotiations Why are some ideologies productive of violence in some places but co operation in others How have some communities been better able to deal with religious racial cultural and class conflict than others How have creative approaches to sharing sovereignty mitigated or transformed territorial disputes that once seemed intractable Geographies of Peace is the first book wholly devoted to exploring the geography of peace Drawing on both recent advances in social and political theory and detailed empirical research covering four continents it makes a significant intervention into current debates about peace and violence

The Palgrave Handbook of Disciplinary and Regional Approaches to Peace Oliver Richmond,Sandra Pogodda,Jasmin Ramovic,2016-03-15 In this handbook a diverse range of leading scholars consider the social cultural economic political and developmental underpinnings of peace This handbook is a much needed response to the failures of contemporary peacebuilding missions and narrow disciplinary debates both of which have outlined the need for more interdisciplinary work in International Relations and Peace and Conflict studies Scholars students and policymakers are often disillusioned with universalist and northern dominated approaches and a better understanding of the variations of peace and its building blocks across different regions is required Collectively these chapters promote a more differentiated notion of peace employing comparative analysis to explain how peace is debated and contested

The Geography of Border Landscapes Dennis Rumley,Julian V. Minghi,2014-10-03 This volume is about border landscapes with emphasis on the varying impact that political decision making and ideological differences can have on the environment at border locations for example This volume by political geography experts from across the globe provides important insights specifically into border landscapes and so serves to further our understanding of aspects of cultural landscapes

America's Place in the Geography of War and Peace Nicholas John Spykman,1942

Making Geographies of Peace and Conflict Colin Flint,Kara E.

Dempsey,2023-11-17 This book illustrates the diversity of current geographies ontologies engagements and epistemologies of peace and conflict It emphasizes how agencies of peace and conflict occur in geographic settings and how those settings shape processes of peace and conflict The essence of the book s logic is that war and peace are manifestations of the intertwined construction of geographies and politics Indeed peace is never completely distinct from war Each chapter in the book will demonstrate understandings of how the myriad spaces of war and peace are forged by multiple agencies some possibly contradictory The goals of these agents vary as peace and war are relational place specific processes The reader will

understand the mutual construction of spaces and processes of peace and conflict through engagement with the concepts of agency the mutual construction of politics and space geographic scales multiple geographies the twin dynamics of empathy othering and inclusivity partitioning and resistance militarism The book discusses the intertwined nature of peace and conflict including reference to the environment global climate change borders technology and postcolonialism This book is valuable for instructors teaching a variety of senior level human geography courses including graduate level classes It will appeal to those working in political geography historical geography sociology of geographic knowledge feminist geography cultural and economic geography political science and international relations
