The Geometry Of Art And Life 1946:

The Geometry of Art and Life Matila Ghyka, 2013-10 This is a new release of the original 1946 edition **An Architecture of Parts: Architects, Building Workers and Industrialisation in Britain 1940 - 1970** Christine Wall, 2013-07-04 This book is unique in describing the history of post war reconstruction from an entirely new perspective by focusing on the changing relationship between architects and building workers It considers individual as well as collective interactions with technical change and in doing so brings together for the first time an extraordinary range of sources including technical archives oral history and visual material to describe the construction process both during and in the decades after the war It focuses on the social aspects of production and the changes in working life for architects and building workers with increasing industrialization in particular analysing the effect on the building process of introducing dimensionally co ordinated components Both architects and building workers have been accused of creating a built environment now popularly discredited architects responsible for poor design and building workers for poor workmanship However many of the structures and ideas underpinning this period of rapid change were revolutionary in their commitment to a complete transformation of the building process An Architecture of Parts adds to the growing literature on changes in the building world during and immediately after the Second World War It is significant both empirically and historically in its examination of the ideas technology and relationships that fired industrialization of the building process in mid century Britain **The Organizational Complex** Reinhold Martin, 2005-09-23 A historical and theoretical analysis of corporate architecture in the United States after the Second World War The Organizational Complex is a historical and theoretical analysis of corporate architecture in the United States after the Second World War Its title refers to the aesthetic and technological extension of the military industrial complex in which architecture computers and corporations formed a network of objects images and discourses that realigned social relations and transformed the postwar landscape In depth case studies of architect Eero Saarinen s work for General Motors IBM and Bell Laboratories and analyses of office buildings designed by Skidmore Owings Merrill trace the emergence of a systems based model of organization in architecture in which the modular curtain wall acts as both an organizational device and a carrier of the corporate image Such an image of the corporation as a flexible integrated system is seen to correspond with a humanization of corporate life as corporations decentralize both spatially and administratively Parallel analyses follow the assimilation of cybernetics into aesthetics in the writings of artist and visual theorist Gyorgy Kepes as art merges with techno science in the service of a dynamic new pattern seeing Image and system thus converge in the organizational complex while top down power dissolves into networked pattern based control Architecture as one among many media technologies supplies the patterns images of organic integration designed to regulate new and unstable human machine assemblages **The Pythagorean Theorem** Eli Maor, 2019-11-19 Frontmatter Contents List of Color Plates Preface Prologue Cambridge England 1993 1 Mesopotamia 1800

Hoeynck, 2019-05-03 *Staying Open: Charles Olson's Sources and Influences* investigates the interdisciplinary influences on the work of the mid-Century American poet Charles Olson. This edited collection of essays covers Olson's diverse non-literary interests including his engagement with the music of John Cage and Pierre Boulez, his interests in abstract expressionism and his readings of philosopher Alfred North Whitehead. The essays also examine Olson's pedagogy, which he developed in the experimental environment at Black Mountain College, as well as his six-month archeological journey through the Yucatan Peninsula in 1950 to explore the culture of the Maya. This book will therefore be a strong research aid to scholars working in diverse fields: music, archeology, pedagogy, philosophy, art, and psychology, as it outlines methods for close interdisciplinary work that can uncover the mechanics of Olson's creative literary processes. Building on the straightforward scholarship of George Butterick, whose *Guide to the Maximus Poems* remains indispensable for readers of Olson's work, the essays in this volume will also guide readers through the thick allusions within *The Maximus Poems* itself. New interest in the wide-ranging and non-literary nature of Olson's thought in several recent academic works makes this book both timely and necessary. *Physics Envy: American Poetry and Science in the Cold War and After* by Peter Middleton, as well as *Contemporary Olson* edited by David Herd, have started the process of uncovering the extent to which Olson's interdisciplinary interests inflected his poetic compositions. *Staying Open* extends the preliminary investigations of Olson's non-literary sources in those volumes by bringing together a community of scholars working across disciplines and within a wide variety of humanistic concerns.

De Stijl Continued Jonneke Jobse, 2005 From 1958 to 1964 the journal *Structure* was a major platform for artists reconsidering the design tenets and underlying principles of the Bauhaus, Constructivism, and De Stijl. This book explores the artist's body of ideas in meticulous detail. The Essential Paul Laffoley Douglas Walla, 2016-05-09 Paul Laffoley is a Visionary artist who lives and works in a tiny space in Boston he calls the Boston Visionary Cell. A trained architect, Laffoley produces brilliantly colored mandala paintings filled with symbols and texts. Each painting is accompanied by a text called a thought form, which serves as commentary on the painting's content. The paintings, many of them large 73 x 73 inches, have titles that range from the paranormal and arcane (*The Ectoplasmic Man*, *The Sexuality of Robots*) to the erudite (*De Rerum*).

Natura referring to the poet Lucretius Laffoley is interested in the mechanics of mysticism time and space dreams magic and consciousness In addition to painting he has also designed a time machine and a prayer gun This book collects what Laffoley and his gallerist Douglas Walla see as the essential works 94 color plates w 91 attendant thought forms It also includes an introduction by Walla a biography of Laffoley by artist Steven Moskowitz and essays by two scholars Linda Dalrymple Henderson University of Texas at Austin Art History is a renowned expert on Henri Bergson Duchamp the art science juncture and the fourth dimension Arielle Saiber associate professor of Italian Bowdoin College analyzes one Laffoley s major works Dante s Divine Comedy Triptych *Visual Culture and Mathematics in the Early Modern Period* Ingrid Alexander-Skipnes, 2017-01-06 During the early modern period there was a natural correspondence between how artists might benefit from the knowledge of mathematics and how mathematicians might explore through advances in the study of visual culture new areas of enquiry that would uncover the mysteries of the visible world This volume makes its contribution by offering new interdisciplinary approaches that not only investigate perspective but also examine how mathematics enriched aesthetic theory and the human mind The contributors explore the portrayal of mathematical activity and mathematicians as well as their ideas and instruments how artists displayed their mathematical skills and the choices visual artists made between geometry and arithmetic as well as Euclid s impact on drawing artistic practice and theory These chapters cover a broad geographical area that includes Italy Switzerland Germany the Netherlands France and England The artists philosophers and mathematicians whose work is discussed include Leon Battista Alberti Nicholas Cusanus Marsilio Ficino Francesco di Giorgio Leonardo da Vinci and Andrea del Verrocchio as well as Michelangelo Galileo Piero della Francesca Girard Desargues William Hogarth Albrecht Dürer Luca Pacioli and Raphael *Leonardo and the Last Supper* Ross King, 2012-08-30 For more than five centuries The Last Supper has been an artistic religious and cultural icon The art historian Kenneth Clark called it the keystone of European art and for a century after its creation it was regarded as nothing less than a miraculous image And yet there is a very human story behind this artistic miracle Ross King s *Leonardo and the Last Supper* is both a biography of one of the most famous works of art ever painted and a record of Leonardo da Vinci s last five years in Milan

e: The Story of a Number Eli Maor, 2011-10-12 The interest earned on a bank account the arrangement of seeds in a sunflower and the shape of the Gateway Arch in St Louis are all intimately connected with the mysterious number e In this informal and engaging history Eli Maor portrays the curious characters and the elegant mathematics that lie behind the number Designed for a reader with only a modest mathematical background this biography brings out the central importance of e to mathematics and illuminates a golden era in the age of science

Embracing the Melody of Phrase: An Psychological Symphony within **The Geometry Of Art And Life 1946**

In some sort of eaten by monitors and the ceaseless chatter of instant connection, the melodic splendor and mental symphony created by the written term usually fade into the back ground, eclipsed by the persistent noise and distractions that permeate our lives.
