The Irish Meteorological Service The First Fifty Years 1936 1986:

The Irish Meteorological Service Lisa Shields, 1987 *A History of Irish Literature and the Environment* Malcolm Sen, 2022-07-28 From Gaelic annals and medieval poetry to contemporary Irish literature *A History of Irish Literature and the Environment* examines the connections between the Irish environment and Irish literary culture Themes such as Ireland's island ecology the ecological history of colonial era plantation and deforestation the Great Famine cultural attitudes towards animals and towards the land the postcolonial politics of food and energy generation and the Covid 19 pandemic this book shows how these factors determine not only a history of the Irish environment but also provide fresh perspectives from which to understand and analyze Irish literature An international team of contributors provides a comprehensive analysis of Irish literature to show how the literary has always been deeply engaged with environmental questions in Ireland a crucial new perspective in an age of climate crisis *A History of Irish Literature and the Environment* reveals the socio cultural racial and gendered aspects embedded in questions of the Irish environment *British Weather and the Climate of Enlightenment* Jan Golinski, 2010-11-15 Enlightenment inquiries into the weather sought to impose order on a force that had the power to alter human life and social conditions *British Weather and the Climate of Enlightenment* reveals how a new sense of the national climate emerged in the eighteenth century from the systematic recording of the weather and how it was deployed in discussions of the health and welfare of the population Enlightened intellectuals hailed climate's role in the development of civilization but acknowledged that human existence depended on natural forces that would never submit to rational control Reading the Enlightenment through the ideas beliefs and practices concerning the weather Jan Golinski aims to reshape our understanding of the movement and its legacy for modern environmental thinking With its combination of cultural history and the history of science *British Weather and the Climate of Enlightenment* counters the claim that Enlightenment progress set humans against nature instead revealing that intellectuals of the age drew characteristically modern conclusions about the inextricability of nature and culture A New History of Ireland Volume VII J. R. Hill, Theodore William Moody, Francis X. Martin, Francis John Byrne, 2010-08-26 Volume VII covers a period of major significance in Ireland's history the division of Ireland and the eventual establishment of the Irish Republic Weather, Climate, Culture Sarah Strauss, Benjamin S. Orlove, 2021-07-28 Throughout history the weather has been both feared and revered for its powerful influence over living creatures Not only does it control our moods activities and fashions but it has also played a crucial role in broader issues of cultural identity concepts of time and economic development In fact the weather has become so ingrained in our everyday routines that many of us forget just how profoundly this omnipotent force shapes culture With the continuing rise in global warming and consequential change in weather patterns our awareness and understanding of this topic has never been so important This fascinating book is the first to explore our close relationship with the weather From folklore to visual representations agricultural and health practices and unusual weather events *Weather Climate Culture* demonstrates that

the way we discuss and interpret meteorological phenomena concerns not only the events in question but more complexly the cultural political and historical framework in which we discuss them Why is it politically safe to discuss current weather conditions but highly controversial to discuss long term climate change Why are the British renowned for talking about the weather and why in the eighteenth century was this regarded as genteel How can accounts of cultural or moral change be associated with narratives of changing climate and vice versa Drawing on a wide range of case studies from around the world this pioneering book provides an original and lively perspective on a subject that continues to have an incalculable impact on the way we live It will serve as a landmark text for years to come **It's Part of What We Are - Volumes 1 and 2 -**

Volume 1: Richard Boyle (1566-1643) to John Tyndall (1820-1893); Volume 2: Samuel Haughton (18210-1897) to John Stewart Bell (1928-1990) Charles Mollan, 2007-11-15 Biographies of more than 100 Irish scientists or those with strong Irish connections in the disciplines of Chemistry and Physics including Astronomy Mathematics etc describing them in their Irish and international scientific social educational and political context Written in an attractive informal style for the hypothetical educated layman who does not need to have studied science Well received in Irish and international reviews
