For at least 20 000 years masking has been a mark of cultural evolution and an indication of magical religious sophistication in society This book provides a comprehensive understanding of the mask as a powerful cultural phenomenon a means by which human groupings attempted to communicate their dignity and sense of purpose as well as establish a continuum between the natural and supernatural worlds It addresses the distinctive environments within which masks flourished and analyzes the mask as a manifestation of art ethnology and anthropology **The Janus File** David Weber, Jacob

Holo, 2022-10-04 The fates of universes aren't the only things time travel can impact Sometimes the effect is a lot more mundane and closer to home And when that happens it's up to the cops of Themis Division to make time turn out right It was supposed to be a routine trip for the members of the Gordian Division both human and AI fly out to Saturn inspect the construction of their latest time machines then fly back But when the division's top scientist and chief engineer are killed in the same freak accident suspicions of foul play run deep Detective Isaac Cho is sent in to investigate but he has more on his mind than just a new case His superiors have saddled him with an exchange officer from the neighboring Admin Special Agent Susan Cantrell whose notion of proper law enforcement involves blowing up criminals first and skipping questions entirely Despite his objections Cho is stuck with an untested partner on a case that increasingly reeks of murder and conspiracy The unlikely pair must work together to unravel this mystery and soon they discover their unique combination of skills might just provide the edge they need But nothing is ever simple where the Gordian Division is involved Not even time itself At the publisher's request this title is sold without DRM Digital Rights Management About prequel *The Gordian Protocol* Tom Clancy-esque exposition of technical details absurd humor and bloody action Echoes of Robert Heinlein lots of exploding temporal spaceships and bodies action packed Booklist A fun and thrilling standalone from Weber and Holo Time travel enthusiasts will enjoy the moral dilemmas nonstop action and crisp writing Publishers Weekly *Handbook for Teaching Introductory Psychology* Michelle Rae Hebl, Charles L. Brewer, Ludy T. Benjamin, Jr., 2001-08-01 Like its predecessors Volume III of the *Handbook for Teaching Introductory Psychology* provides introductory psychology instructors

with teaching ideas and activities that can immediately be put into practice in the classroom It contains an organized collection of articles from Teaching of Psychology TOP the official journal of the Society for the Teaching of Psychology Division 2 of the American Psychological Association Volume III contains 89 articles from TOP that have not been included in other volumes Another distinction between this volume and its predecessors is its emphasis on testing and assessment The book is divided into two sections Section One Issues and Approaches in Teaching Introductory Psychology contains 52 articles on critical issues such as how to approach the course understanding students interests perceptions and motives students existing knowledge of psychology including their misconceptions a comparison of introductory textbooks and tips on how to evaluate them test questions and student factors affecting exam performance an overview of different forms of feedback giving extra credit and how to deal with academic dishonesty Section Two consists of 37 articles that present demonstrations class and laboratory projects and other techniques to enhance teaching and learning in both the introductory as well as advanced courses in the discipline This section is organized so as to parallel the order of topics found in most introductory psychology textbooks Intended for academicians who teach the introductory psychology course and or oversee grad assistants who teach the course all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology

The Masks of Keats Thomas McFarland, 2000 This book surveys the poetic endeavour of John Keats and urges that his true poetry is uniquely constituted by being uttered through three artificial masks rather than through the natural voice of his quotidian self The first mask is formed by the attitudes and reality that ensue from a conscious commitment to the identity of poet as such The second called here the Mask of Camelot takes shape from Keats's acceptance and compelling use of the vogue for medieval imaginings that was sweeping across Europe in his time The third the Mask of Hellas eventuated from Keats's enthusiastic immersion in the rising tide of Romantic Hellenism Keats's great achievement the book argues can only be ascertained by means of a resuscitation of the defunct critical category of genius as that informs his use of the masks To validate this category the volume is concerned throughout with the necessity of discriminating the truly poetic from the meretricious in Keats's endeavour The Masks of Keats thus constitutes a criticism of and a rebuke to the deconstructive approach which must treat all texts as equal and must entirely forego the conception of quality

The Inbetweenness of Things Paul Basu, 2017-03-23 We habitually categorize the world in binary logics of animate and inanimate natural and supernatural self and other authentic and inauthentic The Inbetweenness of Things rejects such Western classificatory traditions which tend to categorize objects using bounded notions of period place and purpose and argues instead for a paradigm where objects are not one thing or another but a multiplicity of things at once Adopting an object centred approach with contributions from material culture specialists across various disciplines the book showcases a series of objects that defy neat classification In the process it explores how things mediate and travel between conceptual worlds in diverse cultural geographic and temporal contexts and how they

embody this mediation and movement in their form With an impressive range of international authors each essay grounds explorations of cutting edge theory in concrete case studies An innovative thought provoking read for students and researchers in anthropology archaeology museum studies and art history which will transform the way readers think about objects
