Three describes several novel pharmacological targets for antiarrhythmic drugs including both ion channel and non ion channel targets Section Four describes promising non pharmacological antiarrhythmic interventions including selective cardiac neural disruption or nerve stimulation aerobic exercise training and diet omega 3 fatty acids Offering an unparalleled look at the current state and future direction of cardiac arrhythmia treatment Novel Therapeutic Targets for Antiarrhythmic Drugs provides an important resource to advanced students working researchers and busy professionals alike **Basic Neurochemistry** Scott T. Brady, PhD, George J. Siegel, MD, R. Wayne Albers, Donald L. Price, 2012 Includes bibliographical references and index **Peroxisomes** G. Gordon Gibson, Brian G. Lake, 2013-04-08 Provides an update on several new aspects of peroxisome biology including the role of the peroxisome proliferator activated receptor The book covers morphological biochemical and molecular biological aspects of peroxisomes **Neurobiology and Clinical Aspects of the Outer Retina** M.B. Djamgoz, S. Archer, S. Vallergera, 2012-12-06 This book deals with the cellular biology biochemistry and physiology of photoreceptors and their interactions with the second order neurons bipolar and horizontal cells The focus is upon the contributions made by these neurons to vision Thus the basic neurobiology of the outer retina is related to the visual process and visual defects that could arise from abnormalities in this part of the retina are highlighted in the first 16 chapters Since all vertebrate retinas have the same basic structure and physiological plan examples are given from a variety of species with an emphasis upon mammals extending to human vision The last four chapters approach the problem from the other end This part of the book covers a range of clinical conditions involving visual abnormalities that are due to cellular defects in the outer retina Although the contents of this book do not represent the proceedings of a conference the concept arose at an international symposium on Recent Advances in Retinal Research which was held at the International Marine Centre in Oristano Sardinia We hope that the book will give a coherent up to date review of the neurobiology and clinical aspects of the outer retina and encourage further integration of these areas Retinal neurobiology has been an intense field of investigation for several decades More recently it has seen significant advances with the application of modern techniques of cell and molecular biology **Issues in Biochemistry and Geochemistry: 2011 Edition**, 2012-01-09 Issues in Biochemistry and Geochemistry 2011 Edition is a ScholarlyEditions eBook that delivers timely authoritative and comprehensive information about Biochemistry and Geochemistry The editors have built Issues in Biochemistry and Geochemistry 2011 Edition on the vast information databases of ScholarlyNews You can expect the information about Biochemistry and Geochemistry in this eBook to be deeper than what you can access anywhere else as well as consistently reliable authoritative informed and relevant The content of Issues in Biochemistry and Geochemistry 2011 Edition has been produced by the world's leading scientists engineers analysts research institutions and companies All of the content is from peer reviewed sources and all of it is written assembled and edited by the editors at ScholarlyEditions and available exclusively from us You now have a source you can cite with authority confidence and credibility More information is
