Words of

War Eric Min, 2025-02-15 In *Words of War* Eric Min pulls back the curtain on when why and how belligerents negotiate while fighting Of all interstate conflicts across the last two centuries two thirds have ended through negotiated agreement Wartime diplomacy is thus commonly seen as a costless and mechanical process solely designed to end fighting But as Min argues that wartime negotiations are not just peacemaking tools They are in fact a highly strategic activity that can also help states manage fight and potentially win wars To demonstrate that wartime talk does more than simply end hostilities Min distinguishes between two kinds of negotiations sincere and insincere Whereas sincere negotiations are good faith honest attempts to reach peace insincere negotiations exploit diplomacy for some other purpose such as currying gaining political support or remobilizing forces Two factors determine whether and how belligerents will negotiate the amount of pressure that outside parties can place on belligerents them to engage in diplomacy and information obtained from fighting on the battlefield Combining statistical and computational text analyses with qualitative case studies ranging from the War of the Roman Republic to the Korean War Min shows that negotiations are more likely to occur with strong external pressures A combination of such pressures and indeterminate battlefield activity however will most likely leads to insincere negotiations that may stoke fighting rather than end it By revealing that diplomacy can sometimes be counterproductive to peace *Words of War* compels us to rethink the assumption that it cannot hurt to promote diplomacy during war *Future Survey Annual*

1986 Michael Marien, 1987-01-01 **The Scourge of War** Paul Diehl, 2010-03-25 J David Singer's legendary *Correlates of War* project represented the first comprehensive effort by political scientists to gather and analyze empirical data about the causes of war In doing so Singer and his colleagues transformed the face of twentieth century political science Their work provoked some of the most important debates in modern international relations about the rules governing territory international intervention and the so called democratic peace Editor Paul F Diehl has now convened some of the world's foremost international conflict analysis specialists to reassess COW's contribution to our understanding of global conflict Each chapter takes one of COW's pathbreaking ideas and reevaluates it in light of subsequent world events and developments in the field The result is a critical retrospective that will reintroduce Singer's important and still provocative findings to a new generation of students and specialists Paul F Diehl is Professor of Political Science and University Distinguished Scholar at the University of Illinois Urbana Champaign *Conflict Resolution and the Structure of the State System* Gregory A.
