Northcott,2015-06-18 People are born in one place Traditionally humans move around more than other animals but in modernity the global mobility of persons and the factors of

production increasingly disrupts the sense of place that is an intrinsic part of the human experience of being on earth. Industrial development and fossil fuelled mobility negatively impact the sense of place and help to foster a culture of placelessness where buildings, fields and houses increasingly display a monotonous aesthetic. At the same time, ecological habitats and diverse communities of species are degraded. Romantic resistance to the industrial evisceration of place and ecological diversity involved the setting aside of scenic or sublime landscapes as wilderness areas or parks. However, the implication of this project is that human dwelling and ecological sustainability are intrinsically at odds. In this collection of essays, Michael Northcott argues that the sense of the sacred which emanates from local communities of faith sustained a parochial ecology which over the centuries shaped communities that were more socially just and ecologically sustainable than the kinds of exchange relationships and settlement patterns fostered by a global and place-blind economy. Hence, Christian communities in medieval Europe fostered the distributed use and intergenerational care of common resources such as alpine meadows, forests or river catchments. But contemporary political economists neglect the role of bounded places and spatial limits in the welfare of human and ecological communities. Northcott argues that place-based forms of community dwelling and exchange such as a local food economy more closely resemble evolved commons governance arrangements and facilitate the revival of a sense of neighbourhood and of reconnection between persons and the ecological places in which they dwell.

*Reminiscences of a Clachnacuddin Nonagenarian* John Maclean, 1886      **Farm Stories** George Rock, 2024-10-21

George Rock grew up in the 1950s on a central Alberta farm that was very typical in some ways but unusual in others. Thanks to the Rock family's inherited expertise, knack for innovation and openness to ideas from colleagues and hired hands, the farm thrived through the 1940s and 1950s. They specialized as suppliers of breeding stock and registered seed to other farms while extending the business into more unusual endeavours including purebred sheep and thoroughbred racehorses. As George matured, he also witnessed the widespread impact of mechanization which enabled the farm to expand in the 1960s but also brought new challenges. Despite being from a small geographically isolated community, George was exposed early on to the larger world through stories from his extended family and the farm's ethnically diverse hired hands. Third in a family of four, his education included not only a one-room schoolhouse but also trips to the US and neighbouring provinces. Even as he grew, learned and got up to mischief, with his younger sister mourning the untimely death of his eldest brother when he was eleven and saw his family embroiled in a national political scandal when he was thirteen. Begun as reminiscences for his grandchildren, the stories in this book recall a rural world that is much changed while also reflecting universal themes of innovation, humour and family adaptation.
