The Maestro Myth Great Conductors In The Pursuit Of Power:

The Maestro Myth Norman Lebrecht, 2001 Nearly ten years after its original publication The Maestro Myth continues to enthrall readers with its insightful look into the lives and careers of the world's most celebrated conductors. Now updated and including two new chapters, this volume portrays the politics and inflated economics surrounding the podiums of today's international classical music scene and the obstacles faced by blacks, women, and gays. From Richard Strauss to Herbert von Karajan to Leonard Bernstein to Simon Rattle, The Maestro Myth examines the world of classical music and the mounting crisis in a profession where genuine talent grows ever scarcer. It is a must-have resource for music aficionados as well as anyone interested in the behind-the-scenes lives of these music masters. Book jacket

Choral Conducting and the Construction of Meaning Liz Garnett, 2017-07-05 It is a truism in teaching choral conducting that the director should look like s/he wishes the choir to sound. The conductor's physical demeanour has a direct effect on how the choir sings at a level that is largely unconscious and involuntary. It is also a matter of simple observation that different choral traditions exhibit not only different styles of vocal production and delivery but also different gestural vocabularies which are shared not only between conductors within that tradition but also with the singers. It is as possible to distinguish a gospel choir from a barbershop chorus or a cathedral choir by visual cues alone as it is simply by listening. But how can these forms of physical communication be explained? Do they belong to a pre-cultural realm of primate social bonding or do they rely on the context and conventions of a particular choral culture? Is body language an inherent part of musical performance styles or does it come afterwards in response to music? At a practical level, to what extent can a practitioner from one tradition mandate an approach as good practice and to what extent can another refuse it on the grounds that we don't do it that way? This book explores these questions at both theoretical and practical levels. It examines textual and ethnographic sources and draws on theories from critical musicology and nonverbal communication studies to analyse them. By comparing a variety of choral traditions, it investigates the extent to which the connections between conductor demeanour and choral sound operate at a general level and in what ways they are constructed within a specific idiom. Its findings will be of interest both to those engaged in the study of music as a cultural practice and to practitioners involved in a choral conducting context that increasingly demands fluency in a variety of styles.
