The Second Empire and the Press N. Isser, 2012-12-06 Public opinion had roots in the nineteenth century with the develop ment of industrialization What is this public It is the mass of individuals who comprise a society or a nation this mass in turn is divided into many groups which have their own interests prejudices and beliefs A govern ment whether democratic or not is well aware of the power of public opinion and is anxious to measure and shape it All three branches of government may direct and educate public thinking using the instru ments of propaganda Propaganda is any idea and action designed to influence the views and actions of others Today s means of propaganda are books newspapers radio movies television public schools and lastly the rostrum Molders of opinion believe that words sounds and pictures accomplish little unless they are carefully organized and inte grated into a well conceived plan Once this is accomplished the ideas 1 conveyed by the words will become part of the people themselves Special techniques such as the employment of fear and the play on prejudices have been used quite succesfully by modern states to impose their own dogmas and policies Because the social scientist has been aware of the study of public opinion he may have concluded that it was a modern innovation but governments have always been concerned with public opinion though not always understanding it and have attempted to influence it *Annual Report of the Chairman - Social Science Research Council* Social Science Research Council (U.S.), 1927 *Bulletin of the British Library of Political and Economic Science* British Library of Political and Economic Science, 1926 **The Balkans in**

International Relations Branimir M Jankovic, Bosko Milosavljevic, 1988-04-06 **Diplomacy in an Age of Nationalism** N.N. Barker, M.L. Brown, 2012-12-06 In the late nineteenth and early twentieth century international rela tions took on new and frightening aspects A resurgent nationalism sharpened the conflicts between states while an increasing industrial ism afforded them the means to make war on a scale previously unimaginable Never before had there been greater need for art and skill in the conduct of international negotiations The statesmen in charge of this intercourse often fell far short of the ideal necessary to eliminate the tensions in international relations They not only had to deal with problems of great complexity but they varied greatly in their temperaments in their abilities and even in their inclinations to accommodate themselves to a solution Nevertheless traditional diplomacy made possible the orderly handling of international crises and kept open the lines of communication With all its imperfections it contributed largely to the maintenance of the European

order from the turbulent mid century through La Belle Epoque The colleagues and former students of Professor Case represented here share with him his interest in this aspect of history They analyse the methods of diplomats and the policies they implemented in articles ranging from empires in Africa and Mexico to Turkey and the Eastern Question But regardless of the diversity of the subjects treated they are never separated from the mainstream of the diplomatic policies of the great powers Moreover the articles represent the same approach to history and the same techniques employed by Professor Case
