But this meant excluding all the influences and activities that would remind organized labor of its ultimate purpose. The result is evident in Gompers' own career. At some midway point, he forgot that he was a revolutionary.

THE MAKING OF THE LABOR BUREAUCRAT: UNION LEADERSHIP IN THE UNITED STATES, 1870-1920. By Warren R. Van Tine. Amherst, University of Massachusetts Press, 1973. Pp. xi + 230. \$10.00.

In recent years scholars have increasingly adopted a Weberian framework in studying the evolution of American society since 1870. They have begun to analyze, in place of cycles of reform and conservatism, the rise of large bureaucratically structured organizations and the concomitant emergence of strong and cohesive professions, both of which contributed to the ordering of a modern, complex, industrial society. In *The Making of a Labor Bureaucrat*, Warren R. Van Tine has attempted to analyze the labor movement in a manner that is consistent with this more general interpretation of American society.

Van Tine begins his study with a quantitative analysis of 150 traditional unionists (defined as those holding office in a national or international union between 1870 and 1895) and 200 new labor leaders or business unionists (those holding similar offices between 1895 and 1920). Rejecting the discontinuities that many earlier scholars posited, Van Tine demonstrates the essential similarities between the two groups. While conceding the existence of certain differences, he argues that they were not related to social or ethnic origins; they were rather "the result of the institutionalization of the union, and the simultaneous professionalization of union leadership." Indeed, the most significant difference between traditional and business unionists was tenure in office. Half of the former held office only about two years, whereas half of the latter held their post for nearly fifteen years.

Along with a sharp increase in tenure in office went other changes in both structure and ideology. By 1920 the vision of the union as a fraternity and a democracy had been replaced by the concept of the union as an army and a business. Similarly, the loose and informal structure of the pre-1895 union was superseded by highly centralized unions in which leaders became typical organization executives presiding over extensive administrative bureaucracies. These leaders wielded considerable authority and helped their unions to work effectively for the interests of the rank and file. Following Lloyd Ulman and other scholars, Van Tine attributes the thrust toward centralization to the changing economic and technological environment which made it imperative to create co-equal na-

Bureaucrats, Planters, and Workers Susan Deans-Smith, 2010-07-05 Honorable Mention Bolton Memorial Prize Conference on Latin American History A government monopoly provides an excellent case study of state society relationships This is especially true of the tobacco monopoly in colonial Mexico whose revenues in the later half of the eighteenth century were second only to the silver tithe as the most valuable source of government income This comprehensive study of the tobacco monopoly illuminates many of the most important themes of eighteenth century Mexican social and economic history from issues of economic growth and the supply of agricultural credit to rural relations labor markets urban protest and urban workers class formation work discipline and late colonial political culture Drawing on exhaustive research of previously unused archival sources Susan Deans Smith examines a wide range of new questions Who were the bureaucrats who managed this colonial state enterprise and what policies did they adopt to develop it How profitable were the tobacco manufactories and how rational was their organization What impact did the reorganization of the tobacco trade have upon those people it affected most the tobacco planters and tobacco workers This research uncovers much that was not previously known about the Bourbon government's management of the tobacco monopoly and the problems and limitations it faced Deans Smith finds that there was as much continuity as change after the monopoly's establishment and that the popular response was characterized by accommodation as well as defiance and resistance She argues that the problems experienced by the monopoly at the beginning of the nineteenth century did not originate from any simmering entrenched opposition Rather an emphasis upon political stability and short term profits prevented any innovative reforms that might have improved the monopoly's long term performance and productivity With detailed quantitative data and rare material on the urban working poor of colonial Mexico Bureaucrats Planters and Workers will be important reading for all students of social economic and labor history especially of Mexico and Latin America

Princes, Brokers, and Bureaucrats Steffen Hertog, 2011-04-27 In Princes Brokers and Bureaucrats the most thorough treatment of the political economy of Saudi Arabia to date Steffen Hertog uncovers an untold history of how the elite rivalries and whims of half a century ago have shaped today's Saudi state and are reflected in its policies Starting in the late 1990s Saudi Arabia embarked on an ambitious reform campaign to remedy its long term economic stagnation The results have been puzzling for both area specialists and political

economists Saudi institutions have not failed across the board as theorists of the rentier state would predict nor have they achieved the all encompassing modernization the regime has touted Instead the kingdom has witnessed a bewildering m range of thorough failures and surprising successes Hertog argues that it is traits peculiar to the Saudi state that make sense of its uneven capacities Oil rents since World War II have shaped Saudi state institutions in ways that are far from uniform Oil money has given regime elites unusual leeway for various institutional experiments in different parts of the state in some cases creating massive rent seeking networks deeply interwoven with local society in others large but passive bureaucracies in yet others insulated islands of remarkable efficiency This process has fragmented the Saudi state into an uncoordinated set of vertically divided fiefdoms Case studies of foreign investment reform labor market nationalization and WTO accession reveal how this oil funded apparatus enables swift and successful policy making in some policy areas but produces coordination and regulation failures in others

Organizing Workers in the Shadow of Slavery Rudi Batzell, 2025-04-23 An original analysis of the relationship between slavery and the labor movement in the late nineteenth and early twentieth centuries During the rise of the labor movement in the late nineteenth century why were American workers unable to organize inclusive trade unions like those formed by their counterparts in the United Kingdom Comparing American and British capitalism in the port cities of Baltimore and Liverpool and the steel cities of Pittsburgh and Sheffield Rudi Batzell reveals that the answer lies in the legacies of slavery and entrenched structures of racial inequality Strikebreaking succeeded more often in the United States because landless Black Americans were out of economic desperation more likely to become scabs and fracture the class solidarity of any union movement Batzell shows in short how racism was and is deeply connected to class migration and capitalism in a global economy marked by slavery and empire In emphasizing the geography of economic inequality this book offers new clarity on the late nineteenth century successes and failures of working class formation More broadly *Organizing Workers in the Shadow of Slavery* makes it clear that the pursuit of justice today will require sustained economic reparations for slavery and colonialism

The Bureaucratic Labor Market Thomas A.
