The Mapping of the Entradas Into the Greater Southwest Dennis Reinhartz, Gerald D. Saxon, 1998 In this groundbreaking and lavishly illustrated volume edited by Dennis Reinhartz and Gerald D Saxon five leading scholars in history geography and cartography discuss the role Spanish explorers and mapmakers played in bringing knowledge of the New World to Europe The entradas of P nfilo de Narv ez and Alvar N nez Cabeza de Vaca 1527 37 Fray Marcos de Niza and Francisco V squez de Coronado 1539 42 and Hernando de Soto and Luis de Moscoso 1539 43 into the Greater Southwest of North America were crucial in the dissemination of information and images of the newly discovered lands The contributors investigate linkages between the early explorers experiences their influence on indigenous peoples and perceptions of the region as reflected in printed maps of the period This body of images which incorporated Indian information made a powerful impression on the still largely preliterate people of Europe reshaping their world Mapping the Mississippian Shatter Zone Robbie Franklyn Ethridge, Sheri Marie Shuck-Hall, 2009-11-01 During the two centuries following European contact the world of late prehistoric Mississippian chiefdoms collapsed and Native communities there fragmented migrated coalesced and reorganized into new and often quite different societies The editors of this volume Robbie Ethridge and Sheri M Shuck Hall argue that such a period and region of instability and regrouping constituted a shatter zone In this anthology archaeologists ethnohistorians and anthropologists analyze the shatter zone created in the colonial South by examining the interactions of American Indians and European colonists The forces that destabilized the region included especially the frenzied commercial traffic in Indian slaves conducted by both Europeans and Indians which decimated several southern Native communities the inherently fluid political and social organization of precontact Mississippian chiefdoms and the widespread epidemics that spread across the South Using examples from a range of Indian communities Muskogee Catawba Iroquois Alabama Coushatta Shawnee Choctaw Westo and Natchez the contributors assess the shatter zone region as a whole and the varied ways in which Native peoples wrestled with an increasingly unstable world and worked to reestablish order **No Settlement, No Conquest** Richard Flint, 2013-11 Flint takes a new look at the Coronado entrada of 1539 42 that marked the earliest large scale contact between Europeans and Native Americans in what is now the American Southwest

Elizabeth Horodowich, Alexander Nagel, 2023-09-05 A connected world as imagined by early modern European artists mapmakers and writers where Asia and the Americas were on a continuum America and Asia mingled in the geographical and cultural imagination of Europe for well over a century after 1492 Through an array of texts maps objects and images produced between 1492 and 1700 this compelling and revelatory study immerses the reader in a vision of a world where Mexico really was India North America was an extension of China and South America was marked by a variety of biblical and Asian sites It asks further What does it mean that the Amerasian worldview predominated at a time when Europe itself was coming into cultural self definition Each of the chapters focuses on a particular artifact map image or book that illuminates aspects of Amerasia from specific European cultural milieus Amerasia shows how it was possible to inhabit a world where America and Asia were connected either imaginatively when viewed from afar or in reality when traveling through the newly encountered lands Readers will learn why early modern maps regularly label Mexico as India why the Amazonas region was named after a race of Asian female warriors and why artifacts and manuscripts that we now identify as Indian and Chinese are entangled in European collections with what we now label Americana Elizabeth Horodowich and Alexander Nagel pose a dynamic model of the world and of Europe's place in it that was eclipsed by the rise of Eurocentric colonialist narratives in the nineteenth and twentieth centuries To rediscover this history is an essential part of coming to terms with the emergent polyfocal global reality of our own time

*Our Sacred Maíz Is Our Mother* Roberto Cintli Rodríguez, 2014-11-06 If you want to know who you are and where you come from follow the ma z That was the advice given to author Roberto Cintli Rodriguez when he was investigating the origins and migrations of Mexican peoples in the Four Corners region of the United States Follow it he did and his book *Our Sacred Ma z Is Our Mother* changes the way we look at Mexican Americans Not so much peoples created as a result of war or invasion they are people of the corn connected through a seven thousand year old ma z culture to other Indigenous inhabitants of the continent Using corn as the framework for discussing broader issues of knowledge production and history of belonging the author looks at how corn was included in codices and Mayan texts how it was discussed by elders and how it is represented in theater and stories as a way of illustrating that Mexicans and Mexican Americans share a common culture Rodriguez brings together scholarly and traditional elder knowledge about the long history of ma z corn cultivation and culture its roots in Mesoamerica and its living relationship to Indigenous peoples throughout the continent including Mexicans and Central Americans now living in the United States The author argues that given the restrictive immigration policies and popular resentment toward migrants a

continued connection to ma z culture challenges the social exclusion and discrimination that frames migrants as outsiders and gives them a sense of belonging not encapsulated in the idea of citizenship The hidden transcripts of corn in everyday culture art song stories dance and cuisine ma z based foods like the tortilla have nurtured even across centuries of colonialism the living ma z culture of ancient knowledge
