Though the practical value of maps during the sixteenth century is well documented their personal and cultural importance has been relatively underexamined In *Worldly Consumers* Genevieve Carlton explores the growing availability of maps to private consumers during the Italian Renaissance and shows how map acquisition and display became central tools for constructing personal identity and impressing one's peers Drawing on a variety of sixteenth century sources including household inventories epigrams dedications catalogs travel books and advice manuals *Worldly Consumers* studies how individuals displayed different maps in their homes as deliberate acts of self fashioning One citizen decorated with maps of Bruges Holland Flanders and Amsterdam to remind visitors of his military prowess for example while another hung maps of cities where his ancestors fought or governed in homage to his auspicious family history Renaissance Italians turned domestic spaces into a microcosm of larger geographical places to craft cosmopolitan erudite identities for themselves creating a new class of consumers who drew cultural capital from maps of the time **Canada before Confederation:**

do not suffice to explain the ways in which European mapping envisioned the Turks in image and narrative. Rather, maps, travel accounts, compendia of knowledge, and other texts created a picture of the Ottoman Empire through a complex layering of history, ethnography, and eyewitness testimony which juxtaposed current events to classical and biblical history, counted space in terms of peoples, routes, and fortresses, and used the land and seascapes of the map to assert ownership, declare victory, and embody imperial power. s reach. Enriched throughout by examples of Ottoman self-mapping, this book examines how Ottomans and their empire were mapped in the narrative and visual imagination of early modern Europe's Christian kingdoms. The maps serve as centerpieces for discussions of early modern space, time, borders, stages of travel, information flows, invocations of authority, and cross-cultural relations.

The Venetian Discovery of America Elizabeth

Horodowich, 2018-09-06 Few Renaissance Venetians saw the New World with their own eyes. As the print capital of early modern Europe, however, Venice developed a unique relationship to the Americas. Venetian editors, mapmakers, translators, writers, and cosmographers represented the New World at times as a place that the city's mariners had discovered before the Spanish, a world linked to Marco Polo's China, or another version of Venice, especially in the case of Tenochtitlan. Elizabeth Horodowich explores these various and distinctive modes of imagining the New World, including Venetian rhetorics of firstness, similitude, othering, comparison, and simultaneity generated through forms of textual and visual pastiche that linked the wider world to the Venetian lagoon. These wide-ranging stances allowed Venetians to argue for their different but equivalent participation in the Age of Encounters. Whereas historians have traditionally focused on the Spanish conquest and colonization of the New World, and the Dutch and English mapping of it, they have ignored the wide circulation of Venetian Americana. Horodowich demonstrates how, with their printed texts and maps, Venetian newsmongers embraced a fertile tension between the distant and the close. In doing so, they played a crucial yet heretofore unrecognized role in the invention of America.

Becoming Neapolitan John A. Marino, 2011-01-03 2011 Winner of the Phyllis Goodhart Gordan Book Prize of the Renaissance Society of America. Naples in the sixteenth and seventeenth centuries managed to maintain a distinct social character while under Spanish rule. John A. Marino's study explores how the population of the city of Naples constructed their identity in the face of Spanish domination. As Western Europe's largest city, early modern Naples was a world unto itself. Its politics were decentralized, and its neighborhoods diverse. Clergy, nobles, and commoners struggled to assert political and cultural power. Looking at these three

groups Marino unravels their complex interplay to show how such civic rituals as parades and festival days fostered a unified Neapolitan identity through the assimilation of Aragonese customs Burgundian models and Spanish governance He discusses why the relationship between mythical and religious representations in ritual practices allowed Naples s inhabitants to identify themselves as citizens of an illustrious and powerful sovereignty and explains how this semblance of stability and harmony hid the city s political cultural and social fissures In the process Marino finds that being and becoming Neapolitan meant manipulating the city s rituals until their original content and meaning were lost The consequent widening of divisions between rich and poor led Naples s vying castes to turn on one another as the Spanish monarchy weakened Rich in source material and tightly integrated this nuanced synthetic overview of the disciplining of ritual life in early modern Naples digs deep into the construction of Neapolitan identity Scholars of early modern Italy and of Italian and European history in general will find much to ponder in Marino s keen insights and compelling arguments
