Frederick E. Trinklein

The God Of Science:

To the Unknown God Emerson A. Cooper,1998 *The Science of God* Gerald L. Schroeder,1997 Many of us would like to reconcile our faith in science with our belief that the Bible is Truth *The God of Science* Frederick E. Trinklein,1971

The God-Science of Black Power Elijah Muhammad,2008 An Elijah Muhammad Speech During The Second Day of The Nation of Islam Saviour s Day Convention in 1967 It aims chiefly at the politically shallow 60 s version of Black power by introducing Real Black Power as it relates to how God and all life originally came out of total black space A profound example of Elijah Muhammad s comprehensive lecture is demonstrated when he asked If the scripture said that in the beginning God said Let there be light then He couldn t have been in the light when he said that He Himself had to have come from Blackness thus ORIGINAL BLACK POWER *The God Equation* Bobby Lynn,2008-05 Scientists and believers have been at odds for thousands of years This age old human conflict is based on the faulty logic that the words God and science don t belong in the same book together never mind the same sentence Wrong The bible is not only the oldest but the most reliable scientific text in our world today and God is the greatest scientist **The Gods of Science** Abraham Kiggundu,2006-05-01 The scientific institution of today stands at a crossroad It will take all of us as members of the human race to which such a cause is of immeasurable importance to help guide it down the best path possible This book contributes by walking the reader through a logical and eye opening discussion around the fundamental principles on which science and our very notion of reality are built The God Experiment Russell Stannard,2000 Down the centuries there have been various attempts to prove the existence of God and to demonstrate God s action in the world Russell Stannard the distinguished physicist and author looks at what modern science can bring to the discussion God, Science, and Reason Michael Bunner,2013-04 Most persons have been led to believe there is a war between science and religion Over the past generation New Atheist icons such as Richard Dawkins Sam Harris Daniel Dennett and Christopher Hitchens have fueled this erroneous belief with provocative best selling books which herald the triumph of science over God To date the scientific and philosophical responses made by persons of faith to these New Atheist affronts have made only a little noise like warning shots fired across the bow of a ship No more In *God Science and Reason* Michael Bunner a scientist who also believes in God takes direct aim at the belief systems of the New Atheists and the world view they espouse He not only exposes the flaws in their own logic and rationale but also presents well reasoned and compelling scientific and philosophical arguments that reveal and decimate their belief systems In the process he demonstrates that the war between science and religion is nothing more than an illusion concocted and sustained by those who have rejected God He also makes a persuasive case that we can understand reality only when we view the world through the lenses of both science and religion **God, Science, and Religious Diversity** Robert T. Lehe,2018-07-24 Two major obstacles to belief in God in the twenty first century are the idea that science is incompatible with religious faith and the idea that the diversity of religions undermines the credibility of belief that

any one religion could be truer than the others This book addresses both of these challenges to belief in God and explores a connection between them It argues that science and religion are not only compatible but that some recent scientific discoveries actually support belief in the existence of the Creator God The diversity of religions is widely believed to undermine the credibility of religious truth claims because of the assumed lack of any way to settle disagreements between different religions This book argues that one rational way to adjudicate disagreements between the claims of diverse religions is to assess their consistency with contemporary science The book considers how Christian theism and Buddhism fare in harmonizing their metaphysical frameworks with contemporary scientific cosmology Although both theistic and Buddhist worldviews resonate with many recent scientific discoveries the Big Bang theory and cosmic fine tuning favor the Christian doctrine of creation

The God Who Would Be Known John Marks Templeton, 2012-06-12 Until recently science's ability to describe and define our universe threatened to make religion obsolete But the well received hardcover edition of this book demonstrated that increasingly God is being revealed through science Now available in paperback this positive work is for all who ponder the mystery and wonder of our universe and the God who plans and oversees it Probing the philosophical and theological impact of scientific discoveries the authors urge us to adopt an analytical and open posture toward both science and religion In the spirit of Sir Francis Bacon this fascinating exploration shows us how the book of God's works natural science can tell us a great deal about the book of God's words Scripture We began this book with the idea that the God who has made this awesome and wonderful universe is utterly beyond our capacity to measure and yet is also the God who would be known He has placed remarkable signs in the heavens on Earth and in ourselves signals of transcendence We conclude that this universe is here by divine plan and that science itself for decades a bastion of unbelief has once again become the source of humankind's assurance of intimate divine concern in its affairs from the authors
