GODS FROM OUTER SPACE ERICH VON DANIKEN,1970 *Gods from Outer Space* Erich von Däniken,1974

Gods from Outer Space Erich von Däniken,1970 **The Gods from Outer Space** Arnold Mostowicz,Alfred

Górny,Erich von Däniken,1978 **GODS FROM OUTER SPACE** ,1970 **The Space-gods Revealed** Ronald Story,1976 First published in 1976 this book is a refutation to the theories and evidence in Erich von Däniken's most famous work *Chariots of the Gods* which suggested that Earth had been visited by extraterrestrials in our distant past With an introduction by Carl Sagan Adapted from Wikipedia **The New Laws of Outer Space** Ugo Pagallo,2024-11-14 This book maps out the moral legal and societal issues brought forth by the use of autonomous systems such as AI and smart robots in outer space Humanity is on the brink of a new space era in which projects for permanent human colonies on the Moon and space missions with autonomous AI systems will soon become a reality Principles and provisions of international space law fall increasingly short in tackling this scenario Experts and institutions have recommended improvements to the legal framework such as new international agreements or policies that would not require any amendment to conventional law Most of the time such proposals and recommendations overlook the challenges posed by technology and how autonomous and intelligent systems in outer space require moral and legal standards of their own This book argues that the traditional focus on satellite communications space related services and the appropriability of celestial resources needs to be integrated by new laws of outer space regulating cybersecurity law and environmental law data governance and consumer protection The new laws of outer space will increasingly concern the development of new standards for the behaviour and decision making of AI systems and smart robots with and without humans aboard deep space missions and in next generation colonies What laws shall govern us out there in a new terra incognita This is the question that the book sets out to answer *The Law of Outer Space* Tanja L. Masson-Zwaan,Stephan Hobe,2010-09-10 It is a remarkable achievement to write a book that almost four decades after its publication has lost virtually none of its relevance Manfred Lachs famous treatise on the Law of Outer Space was originally published in 1972 yet it is still a classic and must read text for space law students today even though copies can nowadays be rarely found The reissue of this remarkable work is therefore timely indeed Its aim is to make the brilliance foresight and clarity of Lachs thinking once more easily accessible to a new generation of scholars Issued on the occasion of the 50th anniversary of the International Institute of Space Law of which Lachs was President this volume reproduces the original text of Lachs work in full with a new preface introduction and index supplied by the editors **The Penguin Book of Outer Space Exploration** John Logsdon,2018-09-11 The fascinating story of how NASA sent humans to explore outer space told through a treasure trove of historical documents publishing in celebration of NASA's 60th anniversary and with a foreword by Bill Nye An extremely useful and thought provoking documentary journey through the maze of space history There is no wiser or more experienced navigator through the twists and turns and ups and downs than John Logsdon James

Hansen New York Times bestselling author of First Man now a feature film starring Ryan Gosling and Claire Foy Among all the technological accomplishments of the last century none has captured our imagination more deeply than the movement of humans into outer space From Sputnik to SpaceX the story of that journey including the inside history of our voyages to the moon depicted in First Man is told as never before in The Penguin Book of Outer Space Exploration Renowned space historian John Logsdon traces the greatest moments in human spaceflight by weaving together essential fascinating documents from NASA s history with his expert narrative guidance Beginning with rocket genius Wernher von Braun s vision for voyaging to Mars and closing with Elon Musk s contemporary plan to get there this volume traces major events like the founding of NASA the first American astronauts in space the Apollo moon landings the Challenger disaster the daring Hubble Telescope repairs and more In these pages we such gems as Eisenhower s reactions to Sputnik the original NASA astronaut application John Glenn s reflections on zero gravity Kennedy s directives to go to the moon discussions on what Neil Armstrong s first famous first words should be firsthand accounts of spaceflight and so much more

Naming and Mapping the Gods in the Ancient Mediterranean Thomas Galoppin, Elodie Guillon, Max Luaces, Asuman Lätzer-Lasar, Sylvain Lebreton, Fabio Porzia, Jörg Rüpke, Emiliano Rubens Urciuoli, Corinne Bonnet, 2022-12-31 Ancient religions are definitely complex systems of gods which resist our understanding Divine names provide fundamental keys to gain access to the multiples ways gods were conceived characterized and organized Among the names given to the gods many of them refer to spaces cities landscapes sanctuaries houses cosmic elements They reflect mental maps which need to be explored in order to gain new knowledge on both the structure of the pantheons and the human agency in the cultic dimension By considering the intersection between naming and mapping this book opens up new perspectives on how tradition and innovation appropriation and creation play a role in the making of polytheistic and monotheistic religions Far from being confined to sanctuaries in fact gods dwell in human environments in multiple ways They move into imaginary spaces and explore the cosmos By proposing a new and interdisciplinary angle of approach which involves texts images spatial and archaeological data this book sheds light on ritual practices and representations of gods in the whole Mediterranean from Italy to Mesopotamia from Greece to North Africa and Egypt Names and spaces enable to better define differentiate and connect gods
