Reconstructing Christian Theology Rebecca S. Chopp, Mark Lewis Taylor, Christian theology needs to be reconstructed in light of recent and momentous intellectual changes social revolutions and steep pedagogical challenges That is the conviction of many of North America s leading theologians whose close collaboration over several years bring us this exciting volume Reconstructing Christian Theology introduces theology in such a way that readers can discern the relevance of historical materials pose theological questions and begin to think theologically for themselves Further like other projects of the Workgroup on Constructive Theology this volume stems from a deep desire to model a credible creative and engaged contemporary theology So each chapter tackles major Christian teaching juxtaposes it with a significant social or cultural challenge and then reconstructs each in light of the other The result is an innovative and compelling way to learn how theology can contribute to rethinking the most pressing issues of our day **Epic of Evolution** Eric Chaisson, 2006 Along the way he examines the development of the most microscopic and the most immense aspects of our universe and the complex ways in which they interact Jacket **Light Years Away** Sudhir Routray, 2004-12 Light Years Away covers the wonderful things of our universe and the possibilities beyond our visible range As the name suggests most of the subject matters of the book are of distant objects like our neighbouring stars star clusters nebulae galaxies galaxy clusters and superclusters In the final chapters the possibilities beyond the observable limit and beyond our universe have been looked at carefully But the facts of solar system and earth have not been ignored The whole view of the creation has been presented in a lucid format The basic questions that we encounter like where is the end boundary of the universe what can be the nature of the extra universal things is light the fastest why we are unable to explain the universe etc have been addressed in a scientific and logical but unsophisticated way Of course some back ground in the subjects like physics and astronomy can help in the better understanding into the matter But for any enthusiast of space and cosmos irrespective of the back ground and age Light Years Away will be a satisfactory text **Literature 1985, Part 1** S. Böhme, U. Esser, Prof. Dr. W. Fricke, H. Hefele, Inge Heinrich, W. Hofmann, R. Krahn, V. R. Matas, Dr. Lutz D. Schmadel, G. Zech, 2013-12-11 Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of the literature concerning all aspects of astronomy astrophysics and their border fields It is devoted to the recording summarizing and indexing of the relevant publications throughout the world Astronomy and Astrophysics Abstracts is prepared by a special department of the Astronomisches Rechen Institut under the auspices of the International Astronomical Union Volume 39 records literature published in 1985 and received before August 15 1985 Some older documents which we received late and which are not surveyed in earlier

volumes are included too We acknowledge with thanks contributions of our colleagues all over the world We also express our gratitude to all organizations observatories and publishers which provide us with complimentary copies of their publications On account of the introduction of an object index the scope of index information will be considerably enlarged beginning with this volume In connection with the subject index an additional source to satisfy the needs of retrieval is opened up Starting with Volume 33 all the recording correction and data processing work was done by means of computers The recording was done by our technical staff members Ms Helga Ballmann Ms Mona El Choura Ms Monika Kohl Ms Sylvia Matyssek Ms Karin Burkhardt Ms Susanne Schlotelburg and Mr Stefan Wagner supported our task by careful proofreading It is a pleasure to thank them all for their encouragement Heidelberg September 1985 The Editors Contents Introduction *Relatively Speaking* Eric Chaisson, Lola Judith Chaisson, 1990 Beginning with a clear nontechnical discussion of both the special and general theories of relativity astrophysicist Chaisson explores their theoretical and experimental bases and what these say about the origin and structure of the universe Library Journal Photographs and drawings *A Final Story* Nasser Zakariya, 2017-11-14 Towards a Final Story is the first history of the modern scientific epic These epic stories pull together our knowledge of the universe uniting material and biological origins from beginning to end The authors of these epics among them Carl Sagan E O Wilson and Steven Weinberg saw their task as providing an integrated schema that would not only bring together but also go beyond the particular scientific results and disciplines available as they wrote their histories Nasser Zakariya traces how such epic stories could achieve what they claimed how they inhabit culture and politics and how they arrived at the present moment from a period in the previous century when inquiries into ultimate origins were regarded by many as unscientific and unanswerable These prominent popular historical narratives of science are important forms of knowledge in their own right They expose what science means in the wider culture and at the same time focus attention on the near paradoxical nature of a universal history narrated by humanity for humanity
