Carol Fulkerson

The Italian Renaissance Garden:

Garden and Grove John Dixon Hunt, 2016-02-15 *Garden and Grove* is a pioneering study of the English fascination with Italian Renaissance gardens John Dixon Hunt studies reactions of English visitors in their journals and travel books to the exciting world of Italian gardens its links with classical villas with Virgil and farming with Ovid and metamorphosis its association with theater its variety its staged debates between art and nature Then he looks at what English visitors made of these Italian garden experiences upon their return home and at how they created Italianate gardens on their estates on their stages and in their poems With a wealth of literary and visual materials previously untapped Hunt provides a new history of an intriguing and vital phase of English garden history Not only does he suggest the centrality of the garden as a focus for many social aesthetic political and philosophical ideas but he argues that the so called English landscape garden before Capability Brown in the late eighteenth century owed much to a long and continuing emulation of Italian Renaissance models

Garden and Grove John Dixon Hunt, 1996 This is a major work and I think Hunt's best Once picked up the book cannot be put down for it is an exciting exegesis of the continuing Italian influence upon English garden art Country Life *The Italian Renaissance Garden* Claudia Lazzaro, 1990-01-01 Looks at the use of fountains and sculpture in sixteenth century Italian gardens **The Italian Renaissance Garden** Carol Fulkerson, 1941 *Garden and Grove* Katherine M. Italian Garden: Restoring a Renaissance Garden in Tuscany Cecilia Hewlett Cecilia Hewlett with Paul, 2018-04 The remarkable story of the project undertaken by Paul Bangay and Monash University to transform a neglected car park at the university's Prato campus in Tuscany into a traditional Renaissance walled garden befitting its location The Italian Garden is part restoration story part vicarious travel tale and a completely fascinating story of how the discovery fifty years ago of a series of neglected and hidden fifteenth century frescos led to the creation of the stunning Palazzo Vaj garden inspired by the water features grottos and planting symmetry of classic Italian Renaissance gardens **Italian Gardens of the**

Renaissance John C. Shepherd, 1986 Originally written in 1925 this work is now published in a special edition intended to reach students and the wider market It is illustrated with 26 surveys of key Renaissance gardens by such famous architects as Michelozzi Bramante Vignola and Scamozzi and Palladio The text includes a preliminary section on the design principles involved It is intended to aid understanding of this key period in garden design **Perspectives on Garden Histories**

Michel Conan, 1999 Garden history is a discipline of contested purposes Perspectives on Garden Histories contributes to a self critical examination of this emergent field of study at the same time offering an overview of its main achievements in several domains such as Italian and Mughal gardens and of the new kinds of investigation to which they have led In its early years garden history centered on architectural studies of garden design but in the 1960s the emphasis shifted from garden design to garden meaning The new paradigm considered gardens as complex works of art and demanded an extensive documentation of the historical context as well as of the figurative and discursive sources This approach in its turn was challenged by neo Marxist scholars who proceeded to view landscape appreciation as an ideological superstructure an outgrowth of agricultural production processes Garden designs and their histories can also be viewed as expressions of ideological conflicts in society Neither gardens nor their history can thus be studied independently of the social cultural and political movements that give prominence to the contested ideologies Gardens can be used to foster some ideologies or reflect a reaction against a social change Comparative research offers another fascinating approach exploring the relations between European landscape concepts and other cultural contexts and discussing issues of cultural dominance and interpretation The emergence of various perspectives has led to the incorporation of further questions into the domain of garden studies which has been moving in new directions and using new methods in search of an adapted theoretical framework This volume offers a striking view of changes taking place in the discipline
