signs C nne Seurat and Signac painted exclusively with patches or dots Through a series of close readings this book looks at the tache as one of the most important features in nineteenth century modernism The tache is a potential meeting point between text and image and a pure trace of the artist s body Even though each manifestation of tacheism generates its own specific cultural effects this book represents the first time a scholar has looked at tacheism as a hidden continuum within modern art With a methodological framework drawn from the semiotics of text and image the author introduces a much needed fine tuning to the classic terms index symbol and icon The concept of the tache as a crossing of sign types enables finer distinctions and observations than have been available thus far within the Peircean tradition The sign crossing theory opens onto the whole terrain of interaction between visual art art criticism literature philosophy and psychology
