**EVOLUTION - THE HUNTERS WHO CAME FROM AFRICA** Ruben Ygua, 2025-08-20 Traditional methods of studying the past have always given greater importance to nationalist religious and moral interests which subordinated the historical fact to the System point of view That's how we have been educated The time has come to simplify and show respect for our ancestors striving to know what really happened in the past and not just what they want to inform us about After so many years of studying History I came to the conclusion that the best study system is through an impartial objective Chronology that just put each event in its exact place in time revealing History without manipulation This Chronology contains not only purely political facts such as the foundation of cities the birth of kingdoms and empires scientific and geographical discoveries natural disasters and epidemics it also includes information on the most different fields of human activity chemistry astronomy geography mathematics and so on In parallel the chronology is complemented by data that do not belong to a specific date but to an entire epoch they are each society generalities curiosities customs the religion of each civilization inventions or discoveries that cannot be placed in an exact date etc The result of all this set is one of the most complete chronologies within its reach periodically updated with the latest archaeological and scientific discoveries and that transforms the reader into an eyewitness of the past understanding the relation of geographically distant facts to each other but closely connected in time and influencing unexpected consequences This is something that traditional history has generally ignored when it was not usable A work of this magnitude could not be published in a single book so I have divided it into several collections and the Spanish originals are being translated into French English Italian and Portuguese The chronology goes from prehistory to the present day year by year as far as possible For those who prefer a deeper and more detailed study I have prepared a second chronology day by day which for now covers from 1789 to 1946 divided into five collections

*The Palaeolithic Origins of Human Burial* Paul Pettitt, 2010-12-20. Humans are unique in that they expend considerable effort and ingenuity in disposing of the dead. Some of the recognisable ways we do this are visible in the Palaeolithic archaeology of the Ice Age. *The Palaeolithic Origins of Human Burial* takes a novel approach to the long-term development of human mortuary activity, the various ways we deal with the dead and with dead bodies. It is the first comprehensive survey of Palaeolithic mortuary activity in the English language. Observations in the modern world as to how

chimpanzees behave towards their dead allow us to identify core areas of behaviour towards the dead that probably have very deep evolutionary antiquity From that point the palaeontological and archaeological records of the Pliocene and Pleistocene are surveyed The core chapters of the book survey the mortuary activities of early hominins archaic members of the genus *Homo* early *Homo sapiens* the Neanderthals the Early and Mid Upper Palaeolithic and the Late Upper Palaeolithic world Burial is a striking component of Palaeolithic mortuary activity although existing examples are odd and this probably does not reflect what modern societies believe burial to be and modern ways of thinking of the dead probably arose only at the very end of the Pleistocene When did symbolic aspects of mortuary ritual evolve When did the dead themselves become symbols In discussing such questions *The Palaeolithic Origins of Human Burial* offers an engaging contribution to the debate on modern human origins It is illustrated throughout includes up to date examples from the Lower to Late Upper Palaeolithic including information hitherto unpublished *National Geographic Concise History of the World* Neil Kagan, 2013 A chronology of world history ranges from the dawn of humankind to the present day examining important events milestones ideas and personalities that occurred simultaneously in different regions of the world *A Population History of the United States* Herbert S.
