The Management Of Inventive People:

Managing Creative People Gordon Torr, 2011-01-19 A clash between the ideology of growth and the growth of ideas between control and creativity between measurement and the immeasurable between predictability and the fickle muses of inspiration in engulfing our boardrooms In this scathing swipe at the institutionalised idiocy that is stifling creativity just at the time the world needs it most Gordon Torr draws from the leading lights of creativity research to demolish the myths that surround the generation of ideas in the modern organisation The curse of the brainstorm the commoditisation of creative talent the deskilling of the imagination the startling inadequacies of management theory these and the many other horrors of idea assassination that run rampant in creative sector companies are dissected and disembowelled in this hilarious expose of the drama that unfolds every time a new idea slides across the boardroom table This book sets out to address the black hole that surrounds the management of creative people debunking many myths of creativity and outlining a revolutionary approach to the pressing issue of creative productivity in the contemporary creative sector company A handbook of tools techniques methods and practical ideas whose USP is a framework for thinking about efficient creative management how to extract value from creative time Gordon Torr presents a logical argument that puts in place the building blocks of the author's knowledge and experience towards the final architecture We need them as never before And we know that they're somehow different Yet the productive management of creative people is an almost totally neglected science I doubt if there's a single industry that wouldn't gain immediate advantage from Gordon Torr's scrupulous and enlightening detective work Jeremy Bullmore

Effective Educational Leadership Nigel Bennett, Megan Crawford, Marion Cartwright, 2008-03-25 Keith Grint's persuasive essay on the art of leadership in *Effective Educational Leadership* is uncannily accurate Tim Brighouse Times Educational Supplement its unique contribution is the exploration of links between leadership discourses and the themes that have emerged from the school effectiveness movements since the 1980s Riley and MacBeath provide one of the most valuable contributions to the volume by arguing that there are no generic recipes for educational leadership but ingredients which need to be carefully selected with a knowledge of specific contexts and needs I would use this book with graduate students and practitioners seeking to develop a perspective about contemporary educational leadership Its greatest contribution is its exploration of the links between

effective leadership and effective education The book also provides optimism in that many of the authors have not capitulated to the reductionist visions of the past two decades There is still hope that educational theorists and practitioners view the life world as the true source of educational inspiration Journal of Educational Administration Leadership is the theme of this decade This series provides an enormously valuable overview of all the critical issues involved in designing leadership as the main strategy for educational reform A great and timely collection Michael Fullan Dean OISE University of Toronto This book makes an excellent contribution to the current debate on Educational Leadership It blends theory with practice and as such provides an important resource for many aspects of leadership development programmes at a variety of levels Its ability to draw upon international perspectives along with examples beyond conventional educational parameters enhances its quality The book contains a well documented account of how leadership has been studied which will appeal both to the academic reader and to the professional provider of CPD in leadership offering a wealth of information that can be practically adopted and adapted for a range of courses Stephen Merrill Journal of Inservice Education Educational management and administration studies focus on leadership as a key determinant of effective educational institutions and currently much leadership preparation is characterized by a rational skills focused approach Placing current thinking in leadership studies in its organizational and historical context this book explores its implications for leadership preparation leadership theory in action and examines some of the dilemmas and tensions facing educational leaders in practice It draws on literature and research from both the private and public sectors It is deliberately international in its content and focus and examines a range of practice both within and outside education Each chapter has a short introduction by the editors setting it in context This book is for providers and students in higher educational institutions for postgraduate level courses in educational management and for leadership development provision for Headteachers induction programmes NPQH and LPSH It is also suitable for short courses and for practitioners occupying or aspiring to leadership roles in schools colleges and other educational organizations

that drive technologically based economic growth Global Innovation Management J. Christopher Westland, 2017-09-16

This is an exciting new edition of a core textbook that explores innovation management from a global perspective Innovation management is increasingly significant both as an academic discipline and as an integral part of the way businesses seek to change and grow However the key factors behind successful innovation and the process by which innovation is turned into profit in the global arena remain largely undefined The new edition provides a unique answer to these questions and offers a step by step guide to innovation strategy development taking into account the global context in which businesses today operate Written by a highly experienced instructor this is an ideal companion for undergraduate students of innovation as well as postgraduate and MBA students taking modules with an innovation component New to this Edition Completely rewritten and restructured to explore in more depth how innovative ideas are identified and strategized in an increasingly globalized world Fully updated and extended case studies on world leading companies Increased attention to commercialized innovation including factors such as intellectual property laws technology acceleration and the competition for venture capital and finance Coverage of new topics such as open innovation and service innovation Expanded coverage of the tools and methods needed to understand financial gain and risk *Intellectual Property Statistics* Eskil Ullberg, 2023-09-01

Patents and other intellectual property IP rights are increasingly part of cross border trade in their own rights Patent transfers and patent licensing between inventors investors and innovators create new business strategies of cooperation in the creation of new technology increasing the productivity in the stock of technology assets and efficient distribution of these rights The rights bundles are then used also increasingly in products and services being traded cross border furthering economic efficiency created by this cooperative strategy Today s international trade statistics however lack statistics explicitly on trade flows from ideas based on IP rights This book offers an idea based statistical framework to measure IP i e increasingly depends on trade in ideas and explores ways to introduce the framework into international standards Specifically it offers a theory of value to measure the flows from IP and an asset view of IP to deal with allocation of resources and who owns these rights This is then contrasted with the current way IP is treated and a gap analysis is used to identify what needs to change in the standards This new framework can help develop theories policies practices and inform the decisions needed to better leverage the human capital formation of inventors everywhere Praise for *Intellectual Property Statistics* In this book Prof Ullberg has undertaken a Herculean task to lay out a paradigm for the collection of IP Statistics to ensure that the market of trade in ideas has the information and data necessary to function well the volume should be viewed as a starting point a work in progress but an important one that could very well influence the development of this important set of data on trade in ideas At a time when global issues require both new ideas and the spread of those ideas widely to help ensure both economic growth and continued global economic convergence data that helps us monitor and evaluate what is happening in trade in ideas will be extremely valuable Robert Koopman American University Washington DC USA and

Creativity Michael D. Mumford, 2011-08-17 Michael D Mumford **Working Aesthetics** Danielle Child, 2019-01-10 Working Aesthetics is about the relationship between art and work under contemporary capitalism Whilst labour used to be regarded as an unattractive subject for art the proximity of work to everyday life has subsequently narrowed the gap between work and art The artist is no longer considered apart from the economic but is heralded as an example of how to work in neoliberal management textbooks As work and life become obscured within the contemporary period this book asks how artistic practice is affected including those who labour for artists Through a series of case studies Working Aesthetics critically examines the moments in which labour and art intersect under capitalism When did labour disappear from art production or accounts of art history Can we consider the dematerialization of art in the 1960s in relation to the deskilling of work And how has neoliberal management theory adopting the artist as model worker affected artistic practices in the 21st century With the narrowing of work and art visible in galleries and art discourse today Working Aesthetics takes a step back to ask why labour has become a valid subject for contemporary art and explores what this means for aesthetic culture today
