The Manufactured Crisis:

The Manufactured Crisis David C. Berliner, Bruce Jesse Biddle, 1997 Over the past decade a rising chorus of critics from William Bennett to Allan Bloom has decried the supposedly dire state of our public schools Kids aren't learning what they should violence and chaos reign in the classroom and bureaucracy strangles attempts at reform But how much of that grim image is really true In *The Manufactured Crisis* two prominent scholars prize winning educational psychologist David C Berliner and leading social psychologist Bruce J Biddle fight back with the good news They debunk a whole series of familiar but untrue statistics about public schools that SAT scores have been dropping when for many groups they are in fact rising that illiteracy is up when in fact the numbers have been skewed because schools are now educating the traditionally disenfranchised in ever larger numbers that investments in public education do not pay off when in fact they lead to greater student achievements and life earnings that private schools are inherently better than public schools when in fact the evidence does not support this charge Berliner and Biddle tear through these and other sensational myths to give the reader an honest look at public education in America and the misguided often tragic proposals that critics have urged for correcting these fictive problems In addition they expose and offer solutions to the real problems American public schools face today schools that continue to provide an increasingly diverse citizenry with the opportunity to better their lives *The*

The Big Con in Education Dennis Redovich, 2005-07 The Big Con in Education is the shocking exposé that details how public schools are used as convenient scapegoats for social and economic woes woes perpetuated not in schoolyards but in the halls of Congress and in the boardrooms of the Fortune 500 Author Dennis W Redovich debunks leading business and political

interests who blame economic problems on an inadequate workforce claiming that schools are not educating children with the life skills needed in the twenty first century Using the United States government s own statistics The Big Con in Education uncovers the lies trumpeted in the media about the serious shortage of skilled workers and the subsequent economic decline It also illustrates a lack of credible rationale to claim that all students need to take higher level courses in academic subjects to prepare to enter the workforce Redovich contends that supply side education and training does not produce high paying jobs any more than does failed supply side economics The Big Con in Education documents the hype propaganda and hypocrisy big business and political propagandists dish out in a war against public education Redovich offers his views on the important facts concerning the reality of the job situation that faces the country Political Scandal and American Pop Culture Jim Twombly,2024-07-31 This book provides a newer definition of political scandal and applies it in a way to remove ordinary corruption from the discussion It then defines pop culture and examines how scandal and pop culture interact The discussion addresses the question when does a scandal actually enter into our pop culture The mechanisms or vehicles by which this occurs include editorial cartoons Broadway shows music movies television and more The first chapter lays out the two main definitions and gives a bit of historical background to the discussion that follows This new edition builds on the previous book with analysis of January 6th George Santos allegations of election fraud and Rudy Giuliani This book works well as a supplement in a course on American Government in American Studies and is aimed at a wide range of readers from college freshmen to more advanced scholars and political junkies Product Liability Reform Act United States. Congress. Senate. Committee on the Judiciary,1987 *Making our Schools the Best in the World* M. Waks,2015-11-17 Thirty years of spirited school reforms have failed to improve our schools and instead have left our public school systems in disarray Meanwhile employment prospects for high school and college graduates are fading and the public is losing faith in its schools The education paradigm inherited from the Industrial Era is in crisis In the last decade however the Internet and new Web 2 0 technologies have placed the entirety of human knowledge in the hands of everyone What will our educational institutions make of this unprecedented flood of Web based learning resources How can schools be transformed to accommodate the new possibilities for personal and social learning Leonard Waks gathers all the pieces of our current educational puzzle together in this groundbreaking book Drawing on new organizational models grounded in

complexity theory Waks maps out an inspiring new paradigm for education in the Internet age and connects all the dots in constructing detailed models for new schools now transformed into open learning centers Finally Waks details action steps readers can take to speed this transformative process along in their own locations *The Second Constitution* Chinedu Nnadi,2025-09-04 In the aftermath of the deadliest domestic terror attack in U S history fear grips the nation and fear is the perfect weapon Congress announces a bold solution a rewritten Constitution one that promises safety unity and order But buried within its clauses lies something far darker Corporate conglomerates are granted sweeping influence Military authority eclipses civilian oversight Civil liberties are quietly erased The New Charter is not reform it is the blueprint for a silent coup Dr Eleanor Price a respected constitutional law professor is invited to advise the drafting committee At first she believes her expertise might safeguard democracy Instead she uncovers a conspiracy so vast it threatens to undo the republic itself When colleagues vanish and allies betray her Eleanor realizes she is being watched and hunted The closer she gets to the truth the more dangerous the game becomes The terror attack that shocked the nation may not have been an outside assault at all but a manufactured crisis designed to justify the coup And unless Eleanor finds a way to expose it the New Charter will become the law of the land With time running out and the machinery of power closing in Eleanor must risk everything her career her freedom even her life to defend the very document she has devoted her life to studying The Constitution was written once to protect liberty Now in the shadows of power it may be rewritten to destroy it

Trivializing Teacher Education Dale D. Johnson, Bonnie Johnson, Stephen J. Farenga, Daniel Ness, 2005-07-21 Trivializing Teacher Education The Accreditation Squeeze presents a critical analysis of the National Council for Accreditation of Teacher Education NCATE This accreditation organization has been in existence for 50 years and claims to accredit approximately 700 teacher education programs that prepare two thirds of the nation s teachers There is no convincing research however that NCATE s stamp of approval makes a difference in teacher preparation programs or in beginning teachers competencies There is evidence that NCATE is masterful at self promotion marketing and aligning itself with policy makers and politicians This book illustrates the questionable NCATE processes and requirements and exposes the exorbitant costs accrued by universities seeking NCATE accreditation It points out that the NCATE standards do not address the major issues that impact teaching and learning The book highlights NCATE s support of teacher testing in the face of evidence that such tests lack predictive validity It shows how NCATE is reaching out to accredit for profit organizations and how it sends its evaluators to review international programs in the Middle East The book calls on NCATE to make the professional backgrounds of its examiners reviewers board members and staff transparent It addresses the attention teacher educators must devote to mindless trivial NCATE demands that usurp time that should be spent on their students and their research This book urges teacher educators college faculties and administrators state education officials and legislators parents of school age children

and concerned citizens to open their eyes to this powerful organization NCATE and to examine what it has done to teacher education in the last half century
