The Marc Brown Connection:

Marc Brown Connection Will C. Howell, 1991-01-01 *At Arm's Length* Mike Cadden, 2021-06-28 Literary critics and authors have long argued about the importance or unimportance of an author's relationship to readers. What can be said about the rhetorical relationship that exists between author and reader? How do authors manipulate character specifically to modulate the emotional appeal of character so a reader will feel empathy, awe, even delight? In *At Arm's Length: A Rhetoric of Character in Children's and Young Adult Literature*, Mike Cadden takes a rhetorical approach that complements structural, affective, and cognitive readings. The study offers a detailed examination of the ways authorial choice results in emotional invitation. Cadden sounds the modulation of characters along a continuum from those larger than life and awe-inspiring to the life-sized and empathetic down to the pitiable and ridiculous, and all those spaces between. Cadden examines how authors alternate between holding the young reader at arm's length from and drawing them into emotional intensity. This balance and modulation are key to a rhetorical understanding of character in literature, film, and television for the young. Written in accessible language and of interest and use to undergraduates and seasoned critics, *At Arm's Length* provides a broad analysis of stories for the young child and young adult in book, film, and television. Throughout, Cadden touches on important topics in children's literature studies, including the role of safety in children's media, as well as character in multicultural and diverse literature. In addition to treating traditional works, he analyzes special cases, forms including picture books, verse novels, and graphic novels, and modes like comedy, romance, and tragedy.

[JMP Connections](#) John Wubbel, 2017-10-09 Achieve best in class metrics and get more from your data with JMP. JMP Connections is the small and medium-sized business owner's guide to exceeding customer expectations by getting more out of your data using JMP. Uniquely bifunctional, this book is divided into two parts: the first half of the book shows you what JMP can do for you. You'll discover how to wring every last drop of insight out of your data and let JMP parse reams of raw numbers into actionable insight that leads to better strategic decisions. You'll also discover why it works so well: clear explanations break down the Connectivity platform and metrics in business terms to demystify data analysis and JMP while giving you a macro view of the benefits that come from optimal implementation. The second half of the book is for your technical team, demonstrating how to implement specific solutions relating to data set development and data virtualization. In the end, your organization reduces Full-Time Equivalents while increasing productivity and competitiveness. JMP is a powerful tool for business, but many organizations aren't even scratching the surface of what their data can do for them. This book provides the information and technical guidance your business needs to achieve more. Learn what a JMP Connectivity Platform can do for your business. Understand Metrics on Demand, Real-Time Metrics, and their implementation. Delve into technical implementation with information on configuration and management, version control, data visualization, and more. Make better business decisions by getting more and better information from your data. Business leadership relies on good information to make good business decisions, but what if you

could increase the quality of the information you receive while getting more of what you want to know and less of what you don't need to know. How would that affect strategy operations, customer experience, and other critical areas? JMP can help with that, and JMP Connections provides real actionable guidance on getting more out of JMP.

CyberLit

Marilyn Dover Newman, 2004 Elementary school media specialists and teachers routinely use children's picture books in their lessons. These books add depth and vitality to the curriculum because they are written and illustrated by some of the world's most gifted writers and artists. Yet educators are finding it increasingly harder to insert this pleasant and important activity into the busy school day due to increased pressures to improve test scores, to implement a standards-driven curriculum, and to stay abreast of new technologies to deliver instruction. This book helps educators continue to incorporate literature into the school day in spite of these obstacles. *CyberLit* is a book for those who work with or teach others who work with children in the primary grades. It is for those who use trade books to supplement and enhance health, science, creative writing, history, geography, reading, math, language arts, character education, multicultural studies, holidays, citizenship, and the fine arts. It is for those who love children's literature and book illustration. With this book, you no longer need to get lost in cyberspace. The information has already been searched, collected, assessed, and compiled. Easily accessible and at your fingertips, this directory can help you to get biographical information about authors and illustrators and to learn how they get ideas for stories, how illustrations are created, how to extend the books into the curriculum, and where to find time-saving lesson plans and book-related activities for classroom projects and units. These outstanding websites of children's authors, illustrators, and storybook characters were selected based on their educational value and for the fact that they contain a minimum of commercialization. They are exemplary examples of authors, publishers, and scholars who understand and acknowledge the roles of teachers and librarians. Like little gems in cyberspace, they go beyond the ordinary content for busy educators.

Catalog It! Allison G. Kaplan, 2015-12-07 Whether you're a practicing cataloger looking for a short text to update you on the application of RDA to cataloging records or a school librarian who needs a quick resource to answer cataloging questions, this guide is for you. Since the last edition of this invaluable text was published, the library world has experienced a revolution in descriptive cataloging, the likes of which has not been seen since the early 1980s. This updated third edition of an established and well-respected guide makes it easy for you to stay in step with those monumental changes. The book will help you understand the latest fundamentals of cataloging so you can get items on the library shelves quickly and efficiently. Every chapter has been revised. Changes in standards, including RDA and BISAC, that were alluded to in the second edition are discussed in depth and illustrated with explanations, and sample problem sets are included so you can put theory into practice. In addition, the book provides you with clear headings for easy scanning, as well as cheat sheets and templates for creating records for book and non-book items. Previous editions of this text have been used by library practitioners and library and information science professors across the country because of its spot-on, easy-to-follow guidance on cataloging for school libraries. This new edition builds upon those strengths, adding everything you need to know about current groundbreaking changes.

Racist Love Leslie Bow, 2021-12-13 In *Racist Love* Leslie Bow traces the ways in which Asian Americans become objects

of anxiety and desire Conceptualizing these feelings as racist love she explores how race is abstracted and then projected onto Asianized objects Bow shows how anthropomorphic objects and images such as cartoon animals in children s books home decor and cute tchotchkes contemporary visual art and artificially intelligent robots function as repositories of seemingly positive feelings and attachment to Asianness At the same time Bow demonstrates that these Asianized proxies reveal how fetishistic attraction and pleasure serve as a source of anti Asian bias and violence By outlining how attraction to popular representations of Asianness cloaks racial resentment and fears of globalization Bow provides a new means of understanding the ambivalence surrounding Asians in the United States while offering a theory of the psychological affective and symbolic dynamics of racist love in contemporary America
