The Siphonaptera of Canada George Pearson Holland,1968 **The Siphonaptera of Canada** George P. Holland,1949

The Fleas of Canada, Alaska and Greenland (Siphonaptera) George Pearson Holland,Entomological Society of Canada (1951-),1985 Notes on flea anatomy in relation taxonomy Some aspects of the life history of siphonaptera Key to the genera Order siphonaptera Superfamily pulicoidea Family pulicidae Superfamily ceratophylloidea Family vermipsyllidade Family hystrichopsyllidae Family Ischnopsyllidade Family Leptopsyllidae Family Ceratiphylidae **Technical Bulletin** ,1961

Memoirs of the Entomological Society of Canada ,1985 **Urban Insects and Arachnids** William H.

Robinson,2005-04-14 This account provides the first comprehensive coverage of the insect and other arthropod pests in the urban environment worldwide Presented is a brief description biology and detailed information on the development habits and distribution of urban and public health pests There are 570 illustrations to accompany some of the major pest species The format is designed to serve as a ready reference and to provide basic information on orders families and species The species coverage is international and based on distribution in domestic and peridomestic habitats The references are extensive and international and cover key papers on species and groups The introductory chapters overview the urban ecosystem and its key ecological components and a review of the pests status and modern control strategies The book will serve as a professional training manual and handbook for the pest control professionals regulatory officials and urban entomologists It is organized alphabetically throughout

Canadian Journal of Zoology ,1989 **Medical Insects and Arachnids** R.P. Lane,R.W. Crosskey,2012-12-06 Surprising though it seems the world faces almost as great a threat today from arthropod borne diseases as it did in the heady days of the 1950s when global eradication of such diseases by eliminating their vectors with synthetic insecticides particularly DDT seemed a real possibility Malaria for example still causes tremendous morbidity and mortality throughout the world especially in Africa Knowledge of the biology of insect and arachnid disease vectors is arguably more important now than it has ever been Biological research directed at the development of better methods of control becomes even more important in the light of the partial failure of many control schemes that are based on insecticide although not all is gloom since basic biological studies have contributed enormously to the outstanding success of international control programmes such as the vast Onchocerciasis Control Programme in West Africa It is a sine qua non for proper understanding of the epidemiology and successful vector control of any human disease transmitted by an arthropod that all concerned with the problem medical entomologist parasitologist field technician have a good basic understanding of the arthropod s biology Knowledge will be needed not only of its direct relationship to any parasite or pathogen that it transmits but also of its structure its life history and its behaviour in short its natural history Above all it will be necessary to be sure that it is correctly identified

Classification and Coding System for Compilations from the World Literature on Insects and Other Arthropods that Affect the Health and Comfort of Man Bernard Valentine

Travis, 1962 A system of classifying and coding entomological information from the world literature on arthropods which affect the health and comfort of man onto punch cards was developed to provide a method for readily recovering this information for immediate use More than 700 journals and other scientific publications from which data for coding may be drawn are listed Titles are arranged alphabetically and are numbered for entry on punch cards which also indicate the author and date of publication A geographic code for the world listing major administrative subdivisions for most countries indicates the geographical areas for recording entomological data on punch cards A world map is inclosed to aid in the identification of the major geographic l entries The classification for subject matter consists of 9 categories of information for which space is assigned on the cards Included are designations for genus species geographical range seasonal activity breeding habitat and disease relationships Author *Public Health Service Publication* ,
