Department of Health Services. Advisory Committee on Hazardous Waste Facility Siting Criteria, 1982 **Siting of Hazardous Waste Disposal Facilities in Texas** Lyndon B. Johnson School of Public Affairs. Hazardous Waste Disposal Policy Research Project, 1982 Hazardous Waste Management Facility Siting in Georgia James E. Kundell, Ellen R. Jordan, 1987 Siting Hazardous Waste Management Facilities, 1993 **Hazardous Waste Sites** Michael R. Greenberg, 2017-09-05 Mutual distrust defines the relationship between those who are the sources of hazardous wastes and those who oversee their activities A lack of credibility argue the authors is a formidable if not the biggest obstacle to properly managing hazardous waste in the United States Nowhere is the credibility gap wider than where there are hazardous waste management facilities or where sites have been proposed The purpose of this book is to provide comprehensive perspectives on hazardous waste sites in the United States The sources of hazardous waste are described along with the scientific and legal climates that allowed wastes to be discarded with little attention to impacts Evidence is weighed for and against public health as well as environmental economic and social damages at abandoned sites Political processes and analytical techniques are suggested and illustrated for those who are involved in the siting of new facilities A strategy for hazardous waste management is offered together with approaches to substantially reduce the difficulties faced by local planners and site managers who face a hostile public A historical legacy of mismanagement fueled by exaggeration of impacts and by a lack of information characterizes hazardous waste management in the United States This book will be important to planners environmental scientists and public health officials In order to assure accessibility for the casual reader the authors keep the explanation of mathematical methods and technologies in this area to a minimum Siting Hazardous Waste Treatment Facilities Kent Portney, 1991-02-28 Since the 1960s and 70s a wave of environmental awareness has swept the United States News reports of oil spills DDT damage to wildlife and the nuclear near disaster at Three Mile Island have along with other incidents contributed to a widespread distrust of industry and a collective fear of all chemical processing facilities This fear has been translated according to Kent Portney into local political opposition to the siting of much needed hazardous waste treatment plants the NIMBY not in my backyard syndrome The failure of federal state and local governments to effectively control improper hazardous waste disposal has further strengthened the NIMBY syndrome Portney argues that once it is understood what motivates the array of local attitudes toward hazardous waste treatment facilities and the political constraints placed on the search for solutions effective compromises can be reached The book begins by focusing on the facility siting dilemma and what can be done to find new policies that work Chapter two analyzes what does and does not work in easing the effects of the NIMBY syndrome Democratic political processes are investigated in

chapter three especially those that contribute to the development of NIMBY opposition Chapters four and five present empirical correlates of changes in peoples attitudes and explain how people can ultimately be convinced to support local hazardous waste treatment facilities Social cultural and psychological construction of opposition to facility siting is studied in chapter six Portney presents viable solutions to the facility siting problem in light of the NIMBY syndrome in the concluding chapter This important book will be of great value to practitioners facing actual siting decisions members of statewide siting boards private sector parties wishing to site facilities and those teaching courses in environmental policy or politics
