Permeated by the author s delightful humor this little book explains with nearly no mathematics the main conceptual issues associated with quantum mechanics The issue of determinism Does quantum mechanics signify the end of a deterministic world view The role of the human subject or of the observer in science Since Copernicus science has increasingly tended to

dethrone Man from his formerly held special position in the Universe But quantum mechanics with its emphasis on the notion of observation may once more have given a central role to the human subject The issue of locality Does quantum mechanics imply that instantaneous actions at a distance exist in Nature In these pages the author offers a variety of views and answers bad as well as good to these questions The reader will be both entertained and enlightened by Jean Bricmont's clear and incisive arguments

**The End of Two Illusions** Hamid Dabashi, 2022-04-19 Dismantling the myths that divide Islam and the West this cutting edge work of critical thinking proposes new ways to reread Islamic and

world histories Extending from the front page news coverage of our daily lives back into the deepest and most revelatory histories of the last two hundred years and earlier Hamid Dabashi's *The End of Two Illusions* is a daring provocative and groundbreaking work that dismantles the most dangerous delusions manufactured between two vastly fetishized abstractions Islam and the West With this book Dabashi shows how the civilizational divides imagined between these two cosmic binaries have defined their entanglement in ways that have nothing to do with the lived experiences of either Muslims or the diverse and changing communities scarcely held together by the myth of the West Through detailed historical and contemporary analysis *The End of Two Illusions* untangles the motivations that produced this global fiction Dabashi demonstrates how the West was an ideological commodity and civilizational mantra invented during the European Enlightenment serving as an epicenter for the rise of globalized capitalist modernity In turn Orientalist ideologues went around the world manufacturing equally illusory abstractions in the form of inferior civilizations in India China Africa Latin America and the Islamic world The result was the projection of Islam and the West as the prototype of a civilizational hostility that has given false explanations and flawed prognoses of our contemporary history with weaponized Islamophobia on one side and militant Islamism on the other as its most palpable manifestations Dabashi argues it is long past time to dismantle this dangerous liaison expose and overcome its perilous delusions and reimagine the world beyond its shimmering mirage *The End of Two Illusions* is the most iconoclastic work of critical thought and scholarship to emerge in recent memory clearing the way toward a far more liberating imaginative geography of the world we share
