Adjunctive treatments in which patients are provided additional modalities that can assist in their behavior change or the maintenance of their behavior change, i.e., telehealth, psychoeducation, consumer-driven treatment planning, have a useful role in addressing problems that can't be solved by face-to-face meetings. The adjunctive therapies covered in this book are all based on improving patient's self-management of their problems or the factors that exacerbate their problems. The book is broadly organized into two sections. The first gives a broad overview of the major adjunctive modalities, and the second concentrates on a systematic description of their role in the treatment of a number of special populations while providing practical suggestions for the timing and coordination for the use of the adjunctive therapies discussed in the book.
