Sport and Sleep Daniel Erlacher, 2024-06-03 At first glance sport and sleep appear to be two topics that could hardly be more different Physical and mental peak performance on the one hand inactivity and unconsciousness on the other This book is dedicated to this new issue and uses various examples from sports practice to show that there are numerous points of contact here A theoretical section at the beginning introduces the basics of sports science and sleep research while the much larger section is dedicated to its application in a sporting environment Among other things the sleep behaviour of athletes is presented including how jet lag in sport and sleep deprivation can become noticeable before sporting performances and competitions It also deals with the dream experience of motorised actions and training in lucid dreams The book is aimed at those interested in sports science sleep medicine psychology and neurology as well as trainers and sports enthusiasts who would like to read up on the subject in more detail

The Neuroimmunological Basis of Behavior and Mental Disorders Allan Siegel, Steven S. Zalcman, 2008-11-09 For many years the immune and central nervous systems were thought to function independently with little or no interaction between the two This view has undergone dramatic changes over the past three decades Indeed we now know that there exists various feedback loops between the brain and immune systems that impact significantly upon different behavioral processes including normal behavior and mental disorders Pioneering efforts in generating this change were initiated by a number of early investigators Included were those whose efforts were directed at establishing neuroimmune connections as well as others whose research focused upon the relationship between immunity cytokines and behavior This book brings together outstanding scientists and clinicians who have made major contributions to the rapidly developing field of investigating the relationship between immunity and behavior The book is divided into three parts The first part describes pathways by which the brain and immune systems communicate and interact with each other In the chapter Cytokines and the Blood Brain Barrier provides insight into interactions between the blood brain barrier and cytokines Such interactions underlie basic communication between the immune system and brain that are present in normal as well as in disease conditions In the chapter Neurochemical and Endocrine Responses to Immune Activation The Role of Cytokines the neurochemical and endocrine consequences of immune challenge and cytokine administration on central neurotransmitter activity are discussed
