**Snapshot Photography** Catherine Zuromskis, 2021-08-24 An examination of the contradictions within a form of expression that is both public and private specific and abstract conventional and countercultural Snapshots capture everyday occasions Taken by amateur photographers with simple point and shoot cameras snapshots often commemorate something that is private and personal yet they also reflect widely held cultural conventions The poses may be formulaic but a photograph of loved ones can evoke a deep affective response In Snapshot Photography Catherine Zuromskis examines the development of a form of visual expression that is both public and private Scholars of art and culture tend to discount snapshot photography it is too ubiquitous too unremarkable too personal Zuromskis argues for its significance Snapshot photographers she contends are not so much creating spontaneous records of their lives as they are participating in a prescriptive cultural ritual A snapshot is not only a record of interpersonal intimacy but also a means of linking private symbols of domestic harmony to public ideas of social conformity Through a series of case studies Zuromskis explores the social life of snapshot photography in the United States in the latter half of the twentieth century She examines the treatment of snapshot photography in the 2002 film One Hour Photo and in the television crime drama Law and Order Special Victims Unit the growing interest of collectors and museum curators in vintage snapshots and the snapshot aesthetic of Andy Warhol and Nan Goldin She finds that Warhol's photographs of the Factory community and Goldin's intense and intimate photographs of friends and family use the conventions of the snapshot to celebrate an alternate version of family values In today's digital age snapshot photography has become even more ubiquitous and ephemeral and significantly more public But buried within snapshot photography's mythic construction Zuromskis argues is a site of democratic possibility An

**Making Pictorial Print** Alison Hedley, 2021-10-01

At the end of the nineteenth century print media dominated British popular culture produced in greater variety and on a larger scale than ever before. Within decades new visual and auditory media had ushered in a mechanized milieu displacing print from its position at the heart of cultural life. During this period of intense change illustrated magazines maintained a central position in the media landscape by transforming their letterpress orientation into a visual and multimodal one. Ultimately this transformation was important for the new media cultures of the twentieth and twenty-first centuries. *Making Pictorial Print* recovers this chapter in the history of new media applying concepts from media theory and the digital humanities to analyse four popular late Victorian magazines: the *Illustrated London News*, the *Graphic*, *Pearson's Magazine* and the *Strand* and the scrapbook media that appropriated them. Using the concept of media literacy these case studies demonstrate the ways in which periodical design aesthetics affected the terms of engagement presented to readers creating opportunities for them to participate in and even contribute to popular culture. Shaped by publishers, advertisers and readers themselves the pages of these periodicals document the emergence of modern mass culture as we know it and offer insight into the new media of our digital present.
