Theories of Human Learning Guy R. Lefrançois, Guy R. Lefrançois, 1995 This book is the study of psychological learning theories with a twist. Kongor, a visitor from outer space presented for earthlings in the First Edition, an account of the present state of earth knowledge about learning. Now in the Third Edition, Kongor's cousin Kro has updated, corrected, polished and perfected the text with the help of his earthling host Lefrançois. Essentially the book is a survey and interpretation of several of the important theories and findings in the psychology of learning. It describes and evaluates behavioristic and cognitive theories, looks at connectionism, neural net models, examines memory and motivation and concludes with an overall summary and synthesis. The emphasis throughout is on clarity of presentation, relevance of topics and maintenance of high interest, hence the liberal use of practical illustrations and the occasional use of humor. Lefrançois or Kro takes students on a delightful journey while they absorb and learn from the academic discussion.
