The Private Eye Mary Burns, 1996 In The Private Eye we learn about snow geese through the eyes of Native people scientists artists hunters and farmers Yup ik Eskimo Charles Hunt harvests snow geese along the Yukon River delta each fall continuing a subsistence way of life that has existed for millennia Russian Canadian and US scientists track the movements of the geese each spring and fall banding sexing counting and precisely monitoring the activities of these beautiful birds Robert Bateman provides an artist s view of nature and relates how his curiosity led him to join a camp set up at a remote nesting site Mary Burns also talks to hunters joining a party of them as they wait for their snow geese decoys to lure the real thing into a Westham Island field in the Fraser delta To complete the experience she

prepares snow geese for supper As well Burns travels around the Skagit River delta during a population survey and meets a dairy farmer who describes both the wild flocks that converge on his fields each spring and the snow geese he raises in pens The Private Eye suggests that by acknowledging our many and varied connections with the natural world we will have a better understanding of the human place in it

Ricklefs,1998 This is the first re appraisal in 50 years of concepts of development made in birds This book is a case study in evolutionary diversification of life histories Although birds have a rather uniform body plan and physiology they exhibit marked variation in development type parental care and rate of growth Altricial birds are fully dependent on their parents for warmth and nutrition and begin posthatching life in a more or less embryonic condition At the other extreme such superprecocial species as the megapodes are independent of all parental care from hatching and the neonate able to fly resembles an adult bird This book thus attempts to present an integrative perspective of organism biology ecology and evolution
