Social And Cultural Lives Of Immune Systems:

Social and Cultural Lives of Immune Systems James M. Wilce Jr., 2003-09-02 *Social and Cultural Lives of Immune Systems* introduces a provocative new hypothesis in medico social theory the theory that immunity and disease are in part socially constituted It argues that immune systems function not just as biological entities but also as symbolic concepts charged with political significance Bridging elements of psychology sociology body theory immunology and medical anthropology twelve papers from leading scholars explain some of the health hazards of emotional and social pressure whilst analysing the semiotic and social responses to the imagery of immunity , *Evolutionary Perspectives on Human Development* Robert G. Burgess, Kevin MacDonald, 2005 This new edition of *Evolutionary Perspectives on Human Development* is obligatory reading for anyone interested in the integration of evolutionary theory into developmental psychology It provides a valuable corrective to recent narrow approaches which argue that the human mind is constructed exclusively of domain specific mechanisms and which deemphasize the importance of human psychological and behavioral plasticity Anyone who reads this book will come away with a richer understanding of our shared human nature Bill Irons Northwestern University In this volume Burgess and MacDonald have brought together a distinguished group of psychologists and anthropologists to investigate how given our evolutionary heritage genetic make up and salient environment behavior cognition and emotion unfold from the human organism They make clear that both evolutionary functional and proximate behavioral perspectives are essential to understanding the human mind and its products Many of these essays should be required reading for sociobiologists evolutionary psychologists and evolutionary anthropologists and their ilk Jeffrey Kurland Penn State It is clear that evolutionary biology has a tremendous amount to offer when it comes to our understanding of human development and yet many experts in developmental psychology have remained impervious to these insights At last this may change Burgess and MacDonald have compiled a rich array of theory and data much of it contributed by the leading lights of evolutionary psychology or if you prefer sociobiology A very valuable collection and one that might help define a new and important field David P Barash University of Washington *Evolutionary Perspectives on Human Development* Second Edition considers the role of evolutionary theory in the field of developmental psychology to examine key topics of individual human development This unique book fills an important gap in the literature applying evolutionary models to human development by focusing on central development issues The book emphasizes both domain general evolved psychological mechanisms and domain specific processes The text also integrates behavior genetic research with evolutionary and developmental principles In this contributed volume editors Robert L Burgess and Kevin MacDonald have brought together a distinguished group of social and behavioral scientists employing multiple levels of analysis drawn from a variety of academic disciplines This diverse group of contributors illustrates the enormous power of evolutionary theory by elucidating human behavior and its development and the various ways it is manifested in different environments

Evolutionary Perspectives on Human Development applies evolutionary theory to such topics as parent child relationships the maltreatment of children psychopathology cooperation and competition among siblings and the acquisition of vital resources in different cultural settings from an evolutionary point of view Key Features Comprehensive coverage of the impact of evolutionary theory on human development provides students with the most thorough foundation available in this area Contributions by leading scholars and researchers expose readers to the exciting research and developments that have been occurring in the field An introductory chapter written by the volume editors provides an accessible overview of the book Evolutionary Perspectives on Human Development provides state of the art groundwork in evolutionary theory as viewed by leading thinkers in the field It is an excellent supplementary textbook for advanced undergraduate and graduate courses in evolutionary and developmental psychology

Religion and the Subtle Body in Asia and the West Geoffrey Samuel, Jay Johnston, 2013-04-12 Subtle body practices are found particularly in Indian Indo Tibetan and East Asian societies but have become increasingly familiar in Western societies especially through the various healing and yogic techniques and exercises associated with them This book explores subtle body practices from a variety of perspectives and includes both studies of these practices in Asian and Western contexts The book discusses how subtle body practices assume a quasi material level of human existence that is intermediate between conventional concepts of body and mind Often this level is conceived of in terms of an invisible structure of channels associated with the human body through which flows of quasi material substance take place Contributors look at how subtle body concepts form the basic explanatory structure for a wide range of practices These include forms of healing modes of exercise and martial arts as well as religious practices aimed at the refinement and transformation of the human mindbody complex By highlighting how subtle body practices of many kinds have been introduced into Western societies in recent years the book explores the possibilities for new models of understanding which these concepts open up It is a useful contribution to studies on Asian Religion and Philosophy

The Cultural Politics of the Paralympic Movement P. David Howe, 2008-02-19 Do the Paralympic Games empower the disability sport community Like many other contemporary sporting institutions the Paralympic Games have made the transition from pastime to spectacle and the profile of athletes with disabilities has been increased as a result This book reviews the current status of the Paralympics and challenges the mainstream assumption that the Games are a vehicle for empowerment of the disabled community Using ethnographic methods unique in this area of study P David Howe has undertaken an innovative and critical examination of the social political and economic processes shaping the Paralympic Movement In The Cultural Politics of the Paralympic Movement he presents his findings and offers a new insight into the relationship between sport the body and the culture of disability In doing so he has produced the most comprehensive and radical text about high performance sport for the disabled yet published P David Howe is Lecturer in the Sociology of Sport at Loughborough University He is also a four time Paralympian and former Athlete s Representative to the International Paralympic Committee

Anthropological Conversations Caroline B. Brettell, 2014-10-23 Cultural anthropologists can be an intellectually adventurous crowd open even eager to building bridges across disciplines in the name of understanding human behavior and the human experience more broadly In this first of its kind book Caroline Brettell explores the cross disciplinary conversations that have engaged cultural anthropologists both past and present Brettell highlights a handful of conversations between the discipline of anthropology on the one hand and history geography literature biology psychology and demography on the other She also pinpoints how these exchanges address three enduring issues of anthropological concern the temporal and the spatial dimensions of human experience the scientific and the humanistic dimensions of the anthropological enterprise and the individual and the group population as units of analysis in research *Anthropological Conversations* offers detailed accounts of particular ethnographic methodologies and findings and the theoretical trends informing them as a means of grasping the big picture issues Brettell clearly shows that by engaging with other fields cultural anthropologists have been able to think more deeply about what they mean by culture through this book she invites readers to continue the conversation

Learning Bodies Malou Juelskjaer, Thomas Moser, Theresa Schilhab, 2008-12-31 Is the body a mere container of learning processes Or can we in a productive way develop an approach to learning that includes learning as a bodily phenomenon The authors all work with the development or refinement of theories of learning bodies and in this anthology

they present the state of the art to anybody with an interest in current scientific discussions about the interplay between body movement and learning A full understanding of learning in all its complexity requires that the body is taken into account regardless of whether we are dealing with the neurological foundations of learning processes skill acquisition mental health and illness aesthetics or the physical setting where the learning takes place Body movement and senses in short corporeality provide the necessary experiences for change and development in relation to life long learning This anthology presents a range of theoretical approaches to learning neuroscience psychiatry sociology psychology phenomenology and pedagogy By presenting this range of approaches the anthology raises a central question in the philosophy of science the need for incorporation of different approaches to achieve further insights The first section of the book *The Learning Body* concerns the learning process from a psychological neuroscience and phenomenological point of view In part two *The Encultured Body* gender and aesthetics will be analysed in relation to the body and the community of practice The third section *The Educated Body* sheds light on various aspects of the body in educational contexts and different body related conditions for learning The anthology is of particular interest to researchers and students of education development and psychology and to those interested in body and movement both biomedical and the relation to social science and the humanities
