A Republic, If We Can Teach It Jeffrey Sikkenga,David Davenport,2024-05-14 America faces a crisis in civic education

that imperils the long term health of our country Too many Americans especially young people do not have the knowledge of our history and principles necessary to sustain our republic Recent national test results reveal the sad state of civic education in our schools The 2022 report of the National Assessment of Educational Progress showed that only 22 percent of eighth graders tested were proficient or better in their knowledge of civics and proficiency in US history dropped to an anemic 13 percent The Annenberg Policy Center reported in 2019 that only 39 percent of Americans could name the three branches of government while its 2017 study showed that 37 percent could not name a single right in the First Amendment How can we keep a republic as Benjamin Franklin put it if we don t know what a republic is At a deeper level the crisis is not simply about facts and information If the next generations of Americans do not come to understand that our history and principles are good and that they merit their affection our experiment in self government could fail Action is needed now to reverse the trend

The Politics of Civic Education Eleni M.

Mantas-Kourounis,2024-06-10 This book chronicles the progression of civic education advocacy since the early 2000s It identifies the main actors that called for civic education reform describes their motivations and policy platforms and documents the path taken to capture state policy agendas It argues that No Child Left Behind incentivized civic education advocates to mobilize a call to action to restore emphasis on civics that materialized into national policy reform proposals that successfully captured the agendas of state legislatures and bureaucracies This book analyzes the implementation and sustainability of these civic education policy reforms by undertaking a comparative case study analysis of school districts in Utah and Connecticut Through the voices of teachers and district administrators the book tells the story of what happened when these state policy reforms inspired by national initiatives hit the local level where the rubber meets the road As ideological debates about schools and democracy unfold across the country as civic education advocates and proposals proliferate this book treats civic education not as panacea but as a concrete policy area to be analyzed and understood It contextualizes the current debate and offers a critical assessment of the most recent comprehensive state level civic education policy reform It argues that while questions linger about what type of civic inspired educational interventions

remains most effective for whom where and why the implementation of such interventions are profoundly impacted by local actors and local politics and that future initiatives should take this dimension into consideration *Citizenship Curriculum in Asia and the Pacific* David L. Grossman, Wing On Lee, Kerry J. Kennedy, 2008-08-31 Based on case studies of 11 societies in the world's most dynamic region this book signals a new direction of study at the intersection of citizenship education and the curriculum Following their successful volume *Citizenship Education in Asia and the Pacific: Concepts and Issues* published as No 14 in this series the editors widely regarded as leaders in the field in the Asia Pacific region have gone beyond broad citizenship education frameworks to examine the realities tensions and pressures that influence the formation of the citizenship curriculum Chapter authors from different societies have addressed two fundamental questions 1 how is citizenship education featured in the current curriculum reform agenda in terms of both policy contexts and values and 2 to what extent do the reforms in citizenship education reflect current debates within the society From comparative analysis of these 11 case studies the editors have found a complex picture of curriculum reform that indicates deep tensions between global and local agendas On one hand there is substantial evidence of an increasingly common policy rhetoric in the debates about citizenship education On the other it is evident that this discourse does not necessarily extend to citizenship curriculum which in most places continues to be constructed according to distinctive social political and cultural contexts Whether the focus is on Islamic values in Pakistan an emerging discourse about Chinese democracy a nostalgic conservatism in Australia or a continuing nation building project in Malaysia the cases show that distinctive social values and ideologies construct national citizenship curricula in Asian contexts even in this increasingly globalized era This impressive collection of case studies of a diverse group of societies informs and enriches understanding of the complex relationship between citizenship education and the curriculum both regionally and globally
