Reconsidering Social Constructionism James A. Holstein, Gale Miller, 2006-10-01 With the impact of social interactionist and ethnographic methodology twenty five years ago the research agenda in social problems began to shift its focus giving rise to the Social Constructionism movement The present volume and the related shorter text Constructionist Controversies review the substantial contributions made by social constructionist theorists over that period as well as recent debates about the future of the perspective These contributions redefine the purpose and central questions of social problems theory and articulate a research program for analyzing social problems as social constructions A generation of theorists has been trained in the constructionist perspective and has extended it through numerous analyses of diverse aspects of contemporary social life The debates in this volume pose fundamental questions about the major assumptions of the perspective the ways in which it is practiced and the purposes of social problems theory Their point of departure is Ibarra and Kitsuse's essay cutting new theoretical ground in calling for investigating vernacular resources especially rhetorical forms in the social problems process Contributors are forceful proponents both within and outside of the social constructionist community who take a broad array of positions on the current state of social problems theory and on the rhetorical forms that need exploring They also lay down the general lines for diverse and often competing programs for the future development of the constructionist agenda James A Holstein is professor in and chair of the Department of Social and Cultural Sciences Marquette University He is the editor of Social Problems He has published over three dozen books on topics such as the family mental health and illness social problems the self and quantitative research methods Gale Miller is professor of sociology Marquette University His recent research focuses on social problems theory and the social organization and use of language in everyday life particularly in human service organizations He has published 24 books and

many scholarly articles **Social Constructionism, Discourse and Realism** Ian Parker, 1998-04-28 This book charts a clear and accessible path through some of the key debates in contemporary psychology Drawing upon the wider critical and discursive turn in the human sciences Social Constructionism Discourse and Realism explores comprehensively the many claims about what we can know of reality in social constructionist and discursive research in psychology Relativist versus realist tensions go to the heart of current theoretical and methodological issues not only within psychology but across the social and human sciences By mapping the connections between theory method and politics in social research and placing these within the context of the broader social constructionist and discursive debates the internationally renowned contributors offer the reader an invaluable survey of the debates **Social Constructionisms** Titus Hjelm, 2014-05-22 Social constructionism is one of the key ideas in the social sciences offering different frameworks for understanding the human world But what does it mean when we say that something is socially constructed What exactly do we construct in our social interaction And what actually does the constructing This dynamic text invites critical reflection on these questions and more outlining the various ways that social constructionist theory has been utilised in the social sciences Hjelm introduces the basic assumptions of social constructionism before examining the differences between various constructionist traditions and perspectives from Berger and Luckmann's sociology of knowledge to constructionist approaches in social psychology and discourse analysis Through a diverse range of case studies on religion crime gender and the media the chapters demonstrate how to apply constructionist ideas in empirical social research Social Constructionisms is thus an invaluable source for students and scholars across the social sciences *The Social Construction of What?* Ian Hacking, 1999 Lost in the raging debate over the validity of social construction is the question of what precisely is being constructed Facts gender quarks reality Is it a person An object An idea A theory Each entails a different notion of social construction Ian Hacking reminds us His book explores an array of examples to reveal the deep issues underlying contentious accounts of reality Especially troublesome in this dispute is the status of the natural sciences and this is where Hacking finds some of his most telling cases from the conflict between biological and social approaches to mental illness to vying accounts of current research in sedimentary geology He looks at the issue of child abuse very much a reality though the idea of child abuse is a social product He also cautiously examines the ways in which advanced research on new weapons influences not the content but the form of science In conclusion Hacking comments on the culture wars in anthropology in particular a spat between leading ethnographers over Hawaii and Captain Cook Written with generosity and gentle wit by one of our most distinguished philosophers of science this wise book brings a much needed measure of clarity to current arguments about the nature of knowledge **Social Constructionism in Housing Research** Jim Kemeny, 2017-05-15 By stressing the importance of subjectivity and interpretation social constructionism offers a different conception of reality from the traditional approach to housing policy analysis This book provides an up to date review of the social constructionist

perspective and considers its philosophical basis. It discusses how social problems are constructed and in turn how this informs policy making. It is divided into two parts. The first section is theoretical and discusses the variety of conceptual approaches utilised within the constructionist paradigm. The second part provides a number of empirically based case studies from the UK and Australia to illustrate the different methodologies that form the social constructionist corpus. The book also evaluates both the criticisms that have been made against the social constructionist perspective and the strengths and weaknesses of constructionist methods. It therefore contributes to the development of a future research agenda for social constructionist research in housing and urban policy.

The Reality of Social Construction Dave Elder-Vass, 2012-04-23

Argues that versions of realist and social constructionist ways of thinking about the social world are compatible with each other.

Reconsidering Social Constructionism Gale Miller, 2017-09-29

With the impact of social interactionist and ethnographic methodology twenty five years ago the research agenda in social problems began to shift its focus giving rise to the Social Constructionism movement. The present volume and the related shorter text *Constructionist Controversies* review the substantial contributions made by social constructionist theorists over that period as well as recent debates about the future of the perspective. These contributions redefine the purpose and central questions of social problems theory and articulate a research program for analyzing social problems as social constructions. A generation of theorists has been trained in the constructionist perspective and has extended it through numerous analyses of diverse aspects of contemporary social life. The debates in this volume pose fundamental questions about the major assumptions of the perspective, the ways in which it is practiced and the purposes of social problems theory. Their point of departure is Ibarra and Kitsuse's essay cutting new theoretical ground in calling for investigating vernacular resources, especially rhetorical forms in the social problems process. Contributors are forceful proponents both within and outside of the social constructionist community who take a broad array of positions on the current state of social problems theory and on the rhetorical forms that need exploring. They also lay down the general lines for diverse and often competing programs for the future development of the constructionist agenda.

Examining Mental Health through Social Constructionism Michelle O'Reilly, Jessica Nina Lester, 2017-09-26

This book explores social constructionism and the language of mental distress. Mental health research has traditionally been dominated by genetic and biomedical explanations that provide only partial explanations. However, process research that utilises qualitative methods has grown in popularity. Situated within this new strand of research, the authors examine and critically assess some of the different contributions that social constructionism has made to the study of mental distress and to how those diagnosed are conceptualized and labeled. This will be an invaluable introduction and source of practical strategies for academics, researchers and students as well as clinical practitioners, mental health professionals and others working with mental health such as educationalists and social workers.

The Social Construction of Public Administration Jong S. Jun, 2012-02-01 In this conceptual guided tour of contemporary public administration Jong S Jun challenges the limitations of the discipline which he argues make it inadequate for understanding today's complex human phenomena Drawing on examples and case studies from both Eastern and Western countries he emphasizes critical and interpretive perspectives as a counterforce to the instrumental technical rationality that reduces the field to structural and functionalist views of management He also emphasizes the idea of democratic social construction to transcend the field's reliance on conventional pluralist politics Jun stresses that public administrators and institutions must create opportunities for sharing and learning among organizational members and must facilitate interactive processes between public administrators and citizens so that the latter can voice their problems and opinions The future role of public administrators will be to transcend the limitations of the management and governing of modern public administration and to explore ways of constructing socially meaningful alternatives through communicative action and the participation of citizens

The Social Construction of Global Corruption Elitza Katarova, 2018-12-06 This book offers new ways of thinking about corruption by examining the two distinct ways in which policy approaches and discourse on corruption developed in the UN and the OECD One of these approaches extrapolated transnational bribery as the main form of corrupt practices and advocated a limited scope offense while the other approach tackled the broader structure of the global economic system and advocated curbing the increasing power of multinational corporations Developing nations in particular Chile initiated and contributed much to these early debates but the US sponsored issue of transnational bribery came to dominate the international agenda In the process the corrupt corporation was supplanted by the corrupt politician the corrupt public official and their international counterpart the corrupt country This book sheds light on these processes and the way in which they reconfigured our understanding of the state as an economic actor and the multinational corporation as a political actor
